1 I, Julia E. Romano, hereby declare and state as follows:

2 1. I am an attorney licensed to practice law in California and a Partner at  
3 King & Spalding, LLP, counsel of record for defendants MERCK & CO., MERCK  
4 SHARP & DOHME CORP., ORGANON & CO., and ORGANON LLC (collectively,  
5 “Defendants”). I have personal knowledge of the matters stated below and, if called  
6 upon, could and would testify competently thereto.

7 2. This declaration is submitted in support of Defendants’ Notice of  
8 Removal and Removal of Action and Request for Judicial Notice in Support of  
9 Defendants’ Notice of Removal and Removal.

10 3. Attached hereto as **Exhibit 1** is a true and correct copy of the Complaint,  
11 filed in the Superior Court of the State of California, County of Contra Costa on or  
12 about March 4, 2022, entitled *Amy Anderson et al. v. Merck & Co., et al.* Contra Costa  
13 County Superior Court Case No. C22-00717, along with the Summons, Civil Case  
14 Cover Sheet and Notice of Case Assignment.

15 4. On March 7, 2022, our co-counsel Venable LLP (“Venable”)  
16 downloaded a PDF of the New Jersey Secretary of State’s Entity Details for **Merck &**  
17 **Co., Inc.** Venable found this form by: (1) typing the following URL address into the  
18 New Jersey Secretary of State Business Search website into the search bar:  
19 <https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for  
20 “Business Entity Standing Certificates;” (3) clicking “Business Name;” (4) entering  
21 the company name “Merck & Co., Inc.,” into the box labeled “Business Name;” (5)  
22 selecting the button labeled “Continue;” (6) selecting the first box under the heading  
23 “Short Form;” (7) adding the document to the cart; (8) purchasing the document; and  
24 (9) downloading the document using an access code.

25 5. Attached hereto as **Exhibit 2** is a true and correct copy of the New Jersey  
26 Secretary of State’s Business Entity Short Form Standing Certificate for **Merck &**  
27 **Co., Inc.**, that Venable downloaded using the foregoing process.

28

6. On March 7, 2022, Venable downloaded a PDF of the New Jersey Secretary of State's Status Report for **Merck & Co., Inc.** Venable found this form by: (1) typing the following URL address into the New Jersey Secretary of State Business Search website into the search bar: <https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for "Business Entity Status Reports;" (3) clicking "Business Name;" (4) entering the company name "Merck & Co., Inc.," into the box labeled "Business Name;" (5) selecting the button labeled "Continue;" (6) selecting the first box under the heading "Order Status Report;" (7) adding to cart; (8) purchasing the document; and (9) downloading the document using an access code.

7. Attached hereto as **Exhibit 3** is a true and correct copy of the New Jersey Secretary of State's Status Report for **Merck & Co., Inc.**, that Venable downloaded using the foregoing process.

8. On May 18, 2022, I downloaded an electronic copy of the California Secretary of State's Statement of Information for **Merck Sharp & Dohme Corp.** by: (1) going to the California Secretary of State business search website: <https://bizfileonline.sos.ca.gov/search/business>; (2) entering the company name "Merck Sharp & Dohme Corp." into the search box and clicking "search;" (3) selecting the second link displayed, labeled "Merck Sharp & Dohme Corp. (200917);" (4) clicking "View History;" (5) selecting "Statement of Information – 12/20/2021;" and (6) selecting "Download."

9. Attached hereto as **Exhibit 4** is a true and correct copy of the California Secretary of State's Statement of Information for **Merck Sharp & Dohme Corp.**, filed on December 20, 2021, that I accessed using the foregoing process.

10. Effective May 1, 2022, Merck Sharp & Dohme Corp. merged into Merck Sharp & Dohme LLC.

11. On May 19, 2022, I downloaded a PDF of the New Jersey Secretary of State's Entity Details for **Merck Sharp & Dohme LLC**. I found this form by: (1)

1 typing the following URL address into the New Jersey Secretary of State Business  
2 Search website into the search bar:  
3 <https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for  
4 “Business Entity Standing Certificates;” (3) clicking “Business Name;” (4) entering  
5 the company name “Merck Sharp & Dohme LLC,” into the box labeled “Business  
6 Name;” (5) selecting the button labeled “Continue;” (6) selecting the first box under  
7 the heading “Short Form;” (7) adding the document to the cart; (8) purchasing the  
8 document; and (9) downloading the document.

9 12. Attached hereto as **Exhibit 5** is a true and correct copy of the New Jersey  
10 Secretary of State’s Business Entity Short Form Standing Certificate for **Merck**  
11 **Sharp & Dohme LLC** that I downloaded using the foregoing process.

12 13. On May 19, 2022, I downloaded a PDF of the New Jersey Secretary of  
13 State’s Status Report for **Merck Sharp & Dohme LLC**. I found this form by: (1)  
14 typing the following URL address into the New Jersey Secretary of State Business  
15 Search website into the search bar:  
16 <https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for  
17 “Business Entity Status Reports;” (3) clicking “Business Name;” (4) entering the  
18 company name “Merck Sharp & Dohme LLC” into the box labeled “Business Name;”  
19 (5) selecting the button labeled “Continue;” (6) selecting the first box under the  
20 heading “Order Status Report;” (7) adding to cart; (8) purchasing the document; and  
21 (9) downloading the document.

22 14. Attached hereto as **Exhibit 6** is a true and correct copy of the New Jersey  
23 Secretary of State’s Status Report for **Merck Sharp & Dohme LLC** that I  
24 downloaded using the foregoing process.

25 15. On March 7, 2022, Venable requested a copy of the Delaware Division of  
26 Corporations Short Form Standing Certificate for **Organon & Co.** Venable found this  
27 form by: (1) typing the following URL address into the Delaware Division of  
28 Corporations website into the search bar:

1 <https://icis.corp.delaware.gov/ecorp2/services/e-filing>; (2) clicking the link for  
 2 “certificate request;” (3) clicking “Document Upload;” (4) entering certification  
 3 request information for the company name “Organon & Co.,” into the box labeled  
 4 “Corporation Name;” (5) selecting the method of return “Fed Ex,” (6) selecting the  
 5 button labeled “Continue,” (7) purchasing the document; and (8) receiving the  
 6 document via Fed Ex delivery on March 9, 2022.

7 16. Attached hereto as **Exhibit 7** is a true and correct copy of the Delaware  
 8 Division of Corporations Short Form Standing Certificate for **Organon & Co.**, that  
 9 Venable received via Fed Ex using the foregoing process.

10 17. On March 7, 2022, Venable downloaded a PDF of the New Jersey  
 11 Secretary of State’s Entity Details for **Organon & Co.** Venable found this form by:  
 12 (1) typing the following URL address into the New Jersey Secretary of State Business  
 13 Search website into the search bar:

14 <https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for  
 15 “Business Entity Standing Certificates;” (3) clicking “Business Name;” (4) entering  
 16 the company name “Organon & Co.,” into the box labeled “Business Name;” (5)  
 17 selecting the button labeled “Continue;” (6) selecting the first box under the heading  
 18 “Short Form;” (7) adding the document to the cart; (8) purchasing the document; and  
 19 (9) downloading the document using an access code.

20 18. Attached hereto as **Exhibit 8** is a true and correct copy of the New Jersey  
 21 Secretary of State’s Business Entity Short Form Standing Certificate for **Organon &**  
 22 **Co.**, that Venable downloaded using the foregoing process.

23 19. On March 7, 2022, Venable requested a copy of the Delaware Division of  
 24 Corporations Short Form Standing Certificate for **Organon LLC**. Venable found this  
 25 form by: (1) typing the following URL address into the Delaware Division of  
 26 Corporations website into the search bar:

27 <https://icis.corp.delaware.gov/ecorp2/services/e-filing>; (2) clicking the link for  
 28 “certificate request;” (3) clicking “Document Upload;” (4) entering certification

request information for the company name “Organon LLC,” into the box labeled “Corporation Name;” (5) selecting the method of Return “Fed Ex,” (6) selecting the button labeled “Continue,” (7) purchasing the document; and (8) receiving the document via Fed Ex delivery on March 9, 2022.

20. Attached hereto as **Exhibit 9** is a true and correct copy of the Delaware Division of Corporations Short Form Standing Certificate for **Organon LLC**, that Venable received via Fed Ex using the foregoing process.

21. On March 7, 2022, Venable downloaded a PDF of the New Jersey Secretary of State’s Entity Details for **Organon LLC**. Venable found this form by: (1) typing the following URL address into the New Jersey Secretary of State Business Search website into the search bar:

<https://www.njportal.com/DOR/businessrecords/Default.aspx>; (2) clicking the link for “Business Entity Standing Certificates;” (3) clicking “Business Name;” (4) entering the company name “Organon LLC,” into the box labeled “Business Name;” (5) selecting the button labeled “Continue;” (6) selecting the first box under the heading “Short Form;” (7) adding to cart; (8) purchasing the document; and (9) downloading the document using an access code.

22. Attached hereto as **Exhibit 10** is a true and correct copy of the New Jersey Secretary of State’s Business Entity Short Form Standing Certificate for **Organon LLC**, that Venable downloaded using the foregoing process.

23. On May 18, 2022, I downloaded an electronic copy of the California Secretary of State’s Statement of Information for **Organon LLC** by: (1) going to the California Secretary of State business search website:

<https://bizfileonline.sos.ca.gov/search/business>; (2) entering the company name “Organon LLC.” into the search box and clicking “search;” (3) selecting the second link displayed, labeled “ORGANON LLC (202017610765);” (4) clicking “View History;” (5) selecting “Statement of Information – 5/17/2021;” and (6) selecting “Download.”

FOR COURT USE ONLY  
(SOLO PARA USO DE LA CORTE)

FILED  
MAR 04 2022

CLERK OF THE COURT  
SUPERIOR COURT OF CALIFORNIA  
COUNTY OF CONTRA COSTA  
By: *[Signature]*  
Deputy Clerk

**NOTICE:** You have been sued. The court may decide against you without your being heard unless you respond within 30 days. Read the information below.

You have 30 CALENDAR DAYS after this summons and legal papers are served on you to file a written response at this court and have a copy served on the plaintiff. A letter or phone call will not protect you. Your written response must be in proper legal form if you want the court to hear your case. There may be a court form that you can use for your response. You can find these court forms and more information at the California Courts Online Self-Help Center ([www.courtinfo.ca.gov/selfhelp](http://www.courtinfo.ca.gov/selfhelp)), your county law library, or the courthouse nearest you. If you cannot pay the filing fee, ask the court clerk for a fee waiver form. If you do not file your response on time, you may lose the case by default, and your wages, money, and property may be taken without further warning from the court.

There are other legal requirements. You may want to call an attorney right away. If you do not know an attorney, you may want to call an attorney referral service. If you cannot afford an attorney, you may be eligible for free legal services from a nonprofit legal services program. You can locate these nonprofit groups at the California Legal Services Web site ([www.lawhelpcalifornia.org](http://www.lawhelpcalifornia.org)), the California Courts Online Self-Help Center ([www.courtinfo.ca.gov/selfhelp](http://www.courtinfo.ca.gov/selfhelp)), or by contacting your local court or county bar association. **NOTE:** The court has a statutory lien for waived fees and costs on any settlement or arbitration award of \$10,000 or more in a civil case. The court's lien must be paid before the court will dismiss the case. **[AVISO:]** Lo han demandado. Si no responde dentro de 30 días, la corte puede decidir en su contra sin escuchar su versión. Lea la información a continuación.

Tiene 30 DÍAS DE CALENDARIO después de que le entreguen esta citación y papeles legales para presentar una respuesta por escrito en esta corte y hacer que se entregue una copia al demandante. Una carta o una llamada telefónica no lo protegen. Su respuesta por escrito tiene que estar en formato legal correcto si desea que procesen su caso en la corte. Es posible que haya un formulario que usted pueda usar para su respuesta. Puede encontrar estos formularios de la corte y más información en el Centro de Ayuda de las Cortes de California ([www.sucorte.ca.gov](http://www.sucorte.ca.gov)), en la biblioteca de leyes de su condado o en la corte que le quede más cerca. Si no puede pagar la cuota de presentación, pida al secretario de la corte que le dé un formulario de exención de pago de cuotas. Si no presenta su respuesta a tiempo, puede perder el caso por incumplimiento y la corte le podrá quitar su sueldo, dinero y bienes sin más advertencia.

Hay otros requisitos legales. Es recomendable que llame a un abogado inmediatamente. Si no conoce a un abogado, puede llamar a un servicio de remisión a abogados. Si no puede pagar a un abogado, es posible que cumpla con los requisitos para obtener servicios legales gratuitos de un programa de servicios legales sin fines de lucro. Puede encontrar estos grupos sin fines de lucro en el sitio web de California Legal Services ([www.lawhelpcalifornia.org](http://www.lawhelpcalifornia.org)), en el Centro de Ayuda de las Cortes de California ([www.sucorte.ca.gov](http://www.sucorte.ca.gov)) o poniéndose en contacto con la corte o el colegio de abogados locales. **AVISO:** Por ley, la corte tiene derecho a reclamar las cuotas y los costos exentos por imponer un gravamen sobre cualquier recuperación de \$10,000 ó más de valor recibida mediante un acuerdo o una concesión de arbitraje en un caso de derecho civil. Tiene que pagar el gravamen de la corte antes de que la corte pueda desechar el caso.

1 Plaintiffs AMY ANDERSON, an individual, MERIDETH JONES, an individual, and  
 2 JASON MRAZ, an individual, (hereinafter collectively "Plaintiffs"), allege the following facts and  
 3 claims for relief against Defendants MERCK & CO., INC. a New Jersey Corporation, MERCK  
 4 SHARP & DOHME CORP., a New Jersey Corporation, (collectively referred to as "Merck  
 5 Defendants" or "Merck"), Organon & Co., a Delaware Corporation, and Organon LLC, a Delaware  
 6 Limited Liability Company (collectively referred to as "Organon Defendants" or "Organon") and  
 7 DOES 1 through 10, inclusive, (all collectively referred to herein as "Defendants") and requests a  
 8 trial by jury of all issues and causes of action so triable:

### 9 INTRODUCTION

10 1. Plaintiffs have developed neuropsychiatric injuries as a result of ingesting  
 11 Defendants' prescription pharmaceutical product, Singulair®, indicated for: a) prophylactic and  
 12 chronic treatment of asthma; b) acute prevention of exercise- induced bronchoconstriction (EIB);  
 13 and c) relief of symptoms of allergic rhinitis.

14 2. Merck Defendants knew or should have known of the risks of neuropsychiatric  
 15 injuries prior to the time they began selling Singulair® in 1998. In 1996, Defendant Merck &  
 16 Co., Inc. filed a patent application for montelukast, the active ingredient in Singulair®,  
 17 acknowledging montelukast's possible effects on cerebral spasm. Further, montelukast has been  
 18 tested extensively starting prior to 1998, and continuing through today. Many of these studies have  
 19 demonstrated a correlation—and some show causation—between Singulair® usage and the  
 20 development of neuropsychiatric events. Merck Defendants have ignored these studies.

21 3. Originally, the Singulair® label contained no warnings regarding neuropsychiatric  
 22 events. Over the past 24 years Merck Defendants have slowly and belatedly added grossly  
 23 insufficient warnings regarding neuropsychiatric events to the product label. Finally, on March 4,  
 24 2020, the Food & Drug Administration (FDA) required Merck Defendants to add a BlackBox  
 25 Warning, the strongest type of warning, to Singulair®'s label, regarding neuropsychiatric events.  
 26 FDA also required a new Medication Guide.

27 4. The new Black Box warning provides "serious neuropsychiatric events have been  
 28

1 reported in patients taking Singulair®.” These include:

2 agitation, aggressive behavior or hostility, anxiousness, depression, disorientation,  
3 disturbance in attention, dream abnormalities, dysphagia (stuttering),  
4 hallucinations, insomnia, irritability, memory impairment, obsessive-compulsive  
5 symptoms, restlessness, somnambulism, suicidal thoughts and behavior  
6 (including suicide), tic, and tremor...

7 Psychiatric disorders: agitation including aggressive behavior or hostility,  
8 anxiousness, depression, disorientation, dream abnormalities, hallucinations,  
9 insomnia, irritability, restlessness, somnambulism, suicidal thinking and behavior  
10 (including suicide), tremor [see *Warnings and Precautions* (5.4)].<sup>1</sup>

11 The new warning goes on to state “the benefits of Singulair® may not outweigh the risks...”.

12 5. Merck Defendants also modified the drug labeling Section 5.1 to disclose some  
13 neuropsychiatric events that were reported after Singulair® discontinuation as well as acknowledge  
14 montelukast, the active ingredient in Singulair®, distribution into the brain in rats. In addition,  
15 Merck Defendants modified Section 12.3 to remove the word ‘minimal’ from the description of  
16 montelukast distribution into the brain.

17 6. In its March 4, 2020, press release FDA noted that “many patients and health care  
18 professionals are not fully aware of these risks.” Further, by requiring the addition of the Black Box  
19 warning, the FDA “aims to make sure patients and medical providers have the information available  
20 to make informed treatment decisions.”

## 21 PARTIES

22 7. Plaintiffs are competent individuals over the age of 18. Plaintiffs are citizens and  
23 residents of Contra Costa County, California. At all times relevant herein, Plaintiffs were citizens  
24 and residents of California. At all relevant times herein, Plaintiffs were prescribed Singulair® in  
25 California. Plaintiffs ingested Singulair® in California and sustained injuries therefrom in  
26 California.

27 <sup>1</sup> Merck Sharp & Dohme Corp., a subsidiary of Merck & Co., Inc., “Full Prescribing Information: Singulair®  
28 (montelukast sodium) Tablets, Chewable Tablets, and Oral Granules [US Patent No. 5,565,473],” Reference ID:  
3106826 (Whitehouse Station, NJ: Merck & Co., Inc., 1998, revised Mar. 2012): 3-4, § 5.4: Neuropsychiatric Events;  
6-7, § 6.2: Post-Marketing Experience. Accessed at  
[https://www.accessdata.fda.gov/drugsatfda\\_docs/label/2012/021409s0361bl.pdf](https://www.accessdata.fda.gov/drugsatfda_docs/label/2012/021409s0361bl.pdf).

1           8.     Plaintiff Amy Anderson was prescribed Singulair from 2000 to 2020. Many or all  
2 of her prescriptions were filled with branded Singulair. Some prescriptions may have been filled  
3 with generic Singulair. She used Singulair as prescribed. As a direct and proximate result of  
4 ingesting Singulair®, Plaintiff Amy Anderson suffered neuropsychiatric injury including  
5 depression, anxiety, panic disorder, stuttering, tics, and self harm.

6           9.     Plaintiff Merideth Jones was prescribed Singulair from 1999 to 2020. Many or all  
7 of her prescriptions were filled with branded Singulair. Some prescriptions may have been filled  
8 with generic Singulair. She used Singulair as prescribed. As a direct and proximate result of  
9 ingesting Singulair®, Plaintiff Merideth Jones suffered neuropsychiatric injury including depression  
10 and anxiety.

11          10.    Plaintiff Jason Mraz was prescribed Singulair from 1998 to 2021. Many or all of his  
12 prescriptions were filled with branded Singulair. Some prescriptions may have been filled with  
13 generic Singulair. He used Singulair as prescribed. As a direct and proximate result of ingesting  
14 Singulair®, Plaintiff Jason Mraz suffered neuropsychiatric injury including depression.

15          11.    Plaintiffs became symptomatic while using Singulair®.

16          12.    Had Plaintiffs or the prescribers known that Singulair® could cause Plaintiffs to  
17 suffer neuropsychiatric events, theprescriber would not have prescribed Singulair® and Plaintiffs  
18 would not have ingested Singulair®. Plaintiffs have incurred medical expenses and will continue to  
19 incur expenses in connection with medical treatment as a result of these injuries, which were caused  
20 by Defendants' conduct withrespect to Singulair®'s design, labeling, manufacture, marketing, and  
21 sale. Plaintiffs have endured and will continue to endure pain, suffering, mental anguish, trauma,  
22 and loss of enjoyment of life as a result of these injuries, have suffered lost earnings and/or a loss  
23 of earning capacity, and other injuries and damages to be proven at trial.

24          13.    On information and belief, Merck Defendants are, and at all relevant times herein  
25 were, multi-national pharmaceutical corporations organized under the laws of New Jersey, with their  
26 principal place of business at 2000 Galloping Hill Road, Kenilworth, New Jersey 07033, and doing  
27 business in California. On information and belief, Merck Sharp & Dohme Corp. is, and at all  
28 relevant times was, registered with the California Secretary of State to do business in California.

1           14. Merck Defendants had exclusivity with respect to Singulair® and were the exclusive  
2 manufacturers, distributors, and sellers of Singulair® from 1998 to mid-2012. Merck Defendants  
3 have maintained control of brand name Singulair® at least into 2020 and possibly still maintain  
4 control.

5           15. On information and belief, the Merck Defendants “spun off” Singulair to their  
6 subsidiary, Organon & Co., sometime after the FDA ordered Merck to add the Black Box warning  
7 to Singulair’s label. On information and belief, Organon & Co. is, and at all relevant times herein  
8 was, a corporation organized under the laws of Delaware, with a principal place of business at 30  
9 Hudson Street, Floor 33, Jersey City, New Jersey 07302, and doing business in California. On  
10 information and belief, Organon LLC is a subsidiary of Organon & Co. that distributed Singulair to  
11 Californians, including Plaintiffs. On information and belief, Organon LLC is, and at all relevant  
12 times herein was, a Delaware limited liability company with a principal place of business at 30  
13 Hudson Street, Floor 33, Jersey City, New Jersey 07302. On information and belief, Organon & Co.  
14 and Organon LLC (“Organon”) are, and at all relevant times were, registered with the California  
15 Secretary of State to do business in California.

16           16. On information and belief, subject to discovery regarding the relationship of the  
17 Merck Defendants to Organon, either Merck Defendants or Organon may be liable for injuries  
18 caused by Singulair after FDA directed a black box warning to be added to Singulair before it was  
19 added and physicians, pharmacists and patients were appropriately notified.

20           17. Plaintiffs are informed and believe, and thereon allege that, at all relevant times, the  
21 Merck Defendants and after transfer of the Singulair NDAs to it, Organon, conducts and at all  
22 relevant times conducted substantial, continuous business in California.

23           18. The Merck defendants manufactured, marketed and sold millions of Singulair pills,  
24 including the actual Singulair pills that Plaintiffs used in California during and prior to 2012.

25           19. Since 2012, the Merck defendants have continued to manufacture, market, and sell  
26 Singulair in California at least into 2020 and either the Merck Defendants or Organon did so after  
27 2020.

28           20. On information and belief, Merck Defendants and/or Organon may have

1 subsequently manufactured, marketed and sold the actual Singulair pills used by Plaintiffs in  
2 California.

3 21. Merck defendants engaged in an extensive campaign to educate physicians in  
4 California about the alleged benefits of Singulair, and further misrepresented the safety of Singulair  
5 to physicians in California during this campaign.

6 22. Merck Defendants engaged in extensive Direct-to-Consumer advertising in  
7 California including print ads in magazines sold in California as well as television advertising on  
8 television channels airing in California.

9 23. Plaintiffs are ignorant of the true names and capacities of defendants sued herein as  
10 Does 1 through 10 and therefore sue these defendants by such fictitious names pursuant to California  
11 Code of Civil Procedure section 474. Plaintiffs are informed and believe, and upon such information  
12 and belief, alleges, that each of the defendants designated as a Doe are legally responsible in some  
13 manner for the events and happenings and caused damages, as alleged herein. Plaintiffs will seek  
14 leave of the Court to amend this Complaint to show the true names and capacities of the defendants,  
15 designated as Does, when the same has been ascertained.

16 24. Plaintiffs are informed and believe, and on that basis allege, that at all times  
17 mentioned herein, there existed a unity of interest and ownership among Defendants and each of  
18 them, such that any individuality and separateness between Defendants, and each of them, ceased  
19 to exist. Defendants and each of them, were the successors-in-interest and/or alter egos of the other  
20 Defendants, and each of them, in that they purchased, controlled, dominated and operated each other  
21 without any separate identity, observation of formalities, or other manner of division. To continue  
22 maintaining the façade of a separate and individual existence between and among Defendants, and  
23 each of them, would allow Defendants to perpetrate a fraud and an injustice.

24 25. Plaintiffs are informed and believe, and on that basis allege, that at all times  
25 mentioned herein, Defendants and each of them were the agents, representatives and/or employees  
26 of each and every other Defendant. In doing the things hereinafter alleged, Defendants and each of  
27 them, were acting within the course and scope of said alternative personality, capacity, identity,  
28 agency, representation and/or employment and were within the scope of their authority, whether

1 actual or apparent. Plaintiffs are informed and believe, and on that basis allege, that at all times  
2 mentioned herein, Defendants and each of them were the trustees, partners, servants, joint venturers,  
3 shareholders, contractors, and/or employees of each and every other Defendant, and the acts and  
4 omissions herein alleged were done by them, acting individually, through such capacity and within  
5 the scope of their authority, and with the permission and consent of each and every other Defendant  
6 and that said conduct was thereafter ratified by each and every other Defendant, and that each of  
7 them is jointly and severally liable to Plaintiffs.

### 8 JURISDICTION AND VENUE

9 26. Venue is proper in this Court because Plaintiffs are citizens and residents of Contra  
10 Costa County, California, and during and prior to 2012, Plaintiffs purchased and used Merck  
11 Defendants' Singulair in Contra Costa County, California that caused Plaintiffs' injuries in that  
12 county. Further on information and belief, Defendants made misrepresentations regarding the safety  
13 of Singulair to physicians in Contra Costa County, California.

14 27. The California Superior Court has jurisdiction over all Defendants because, based on  
15 information and belief, each is a corporation and/or entity and/or person organized under the laws  
16 of having its principal place of business in the State of California, a foreign corporation or  
17 association authorized to do business in California and registered with the California Secretary of  
18 State, or that has sufficient minimum contacts in California, is a citizen of California, or otherwise  
19 intentionally avails itself of the California market so as to render the exercise of jurisdiction over it  
20 by the California courts consistent with traditional notions of fair play and substantial justice.

21 28. Further, Defendants have each purposefully availed themselves of the benefits and  
22 protections of the laws within the State of California. Collectively, Defendants conduct substantial,  
23 continuous, and systemic business in California and have had sufficient contact with California such  
24 that the exercise of jurisdiction would be consistent with the traditional notions of fair play and  
25 substantial justice.

### 26 FACTUAL ALLEGATIONS

#### 27 A. Merck's Discovery of Montelukast

28 29. Merck Defendants discovered the anti-asthmatic properties of montelukast, the

1 active ingredient in Singulair® and were granted U.S. Patent No. 5,565,473 on October 15, 1996,  
2 which expired on August 3, 2012. FDA first approved Singulair® for clinical use in 1998.

3 30. Singulair® has become a ubiquitous monotherapy treatment as an alternative to, and  
4 as an add-on therapy to inhaled corticosteroids (ICS) such as fluticasone. Approximately 9.3 million  
5 patients received a dispensed montelukast prescription from U.S. outpatient pharmacies in 2018,  
6 with 2.3 million of these being children younger than 17 years.<sup>2</sup>

7 31. Singulair® (montelukast) is a leukotriene receptor antagonist that binds with high  
8 affinity and selectivity to the cysteinyl leukotriene receptor-1 (CysLTR1) in order to prevent this  
9 receptor from interacting with leukotrienes, which are inflammatory mediators. Such binding  
10 consequently assists in inhibiting many of the physiological actions elicited by CysLTs at the  
11 receptor which could have facilitated asthma or allergic rhinitis. As an example, montelukast  
12 modulates expression of CysLTR1 and CysLTR2 in airway eosinophilic (i.e., high count of white  
13 blood cells) inflammation of OVA-induced asthmatic mice because the drug functions in bodies as  
14 a CysLT1 receptor antagonist.<sup>3</sup>

15 32. Cysteinyl leukotrienes (CysLT) are eicosanoids (i.e., signaling molecules) that are  
16 released by various types of cells, including mast cells and eosinophils, both of which are implicated  
17 in allergy and anaphylaxis as well as the immune system. When these CysLT bind to their  
18 corresponding CysLT receptors (e.g., CysLT binding to CysLT1R), they may act to up- or down-  
19 regulate the receptor and its coordinating effect. For example, CysLT1 binding to CysLT1 receptors  
20 found on smooth muscle cells in respiratory airways simulates specific cell activities that then  
21 facilitate the underlying pathophysiology of asthma and allergic rhinitis.

(citing IQVIA Total Patient Tracker™. Year 2018. Data extracted June 2019). Accessed at  
<https://www.fda.gov/media/135840/download>.

26 <sup>3</sup> Zhang YJ, Zhang L, Wang SB, Shen HH, Wei EQ. Montelukast modulates lung CysLT(1) receptor expression and  
27 eosinophilic inflammation in asthmatic mice. *Acta Pharmacol Sin.* 2004;25(10):1341-1346 (Finding that montelukast  
28 inhibited the up-regulation of the CysLT1 receptor in airway eosinophilic inflammation of ovalbumin- induced (i.e.,  
egg whites) asthmatic mice.

33. Facilitating conditions for asthma include CysLT-mediated airway bronchoconstriction, vascular permeability, occluding mucous secretion, and eosinophil recruitment. In allergic rhinitis, nasal mucosa release CysLTs when exposed to allergens like pollen during both early- and late-phase reactions and then participate in eliciting the prototypical symptoms of allergic rhinitis like a congested nose and congested airway. Simply put, if allergens (e.g., dust and pollen) are the gasoline and CysLTs are the gas pedal that drive the asthma and allergies engine, Singulair® hits the brakes.

#### **B. Singulair Crosses the Blood-Brain-Barrier and Causes Neuropsychiatric Events.**

##### **a. Introduction to the Blood-Brain-Barrier**

34. Montelukast crosses the blood-brain barrier (BBB), which is a semi-permeable (i.e., partial porous) membrane of endothelial cells (blood and lymphatic vessel lining) that is highly selective in preventing solutes in circulating blood from non-selectively entering the extracellular fluid (e.g., cerebrospinal fluid) and thereby interacting with neurons in the central nervous system (CNS). The CNS influences activity within all of the parts of the body and is constituted primarily by the brain and spinal cord. Neurons function to communicate with other cells via connections called synapses. Neurons are like telephones in that they receive signals and synapses are similar to telephone lines that carry signals.

35. The function of the BBB is to protect the brain from circulating pathogens and thereby render bloodborne brain infections rare. No antibodies, only certain antibiotics, and exceedingly few drugs in general may pass the BBB and thereby have an impact on the CNS.

36. The clinical significance of the BBB is due to its difficulty as a drug target to overcome. Difficulty may be attributed to its 100% exclusion of large-molecule neurotherapeutics and 98% exclusion of all small-molecule drugs (e.g., anti-depressants like Prozac, anxiolytics like Xanax).<sup>4</sup> In terms of size and rough complexity, if a small-molecule druglike aspirin (21 Daltons)

<sup>4</sup> See, e.g., Pardridge, William M. "The Blood-Brain Barrier and Neurotherapeutics." *NeuroRx*. 2005 Jan; 2(1): 1—Doi: 10.1602/neurorx.2.1.1; Pardridge. "The Blood-Brain Barrier: Bottleneck in Brain Drug Development." *NeuroRx*. 2005 Jan; 2(1): 3—14. Doi: 10.1602/neurorx.2.3

were a bicycle (~ 20 lbs), a large-molecule drug or small biologic like human growth hormone (~3,000 Daltons) would be a Toyota Prius (~ 3,000 lbs), and a large biologic like immunoglobulin G antibody (~ 25,000 Daltons) would be an F-16 fighter jet (~ 25,000 lbs without fuel).<sup>5</sup>

37. Small molecules are considered anything less than 900 Daltons. A molecular weight of 400 Daltons or less increases a drug's chances of penetrating the CNS.<sup>9</sup> Montelukast weighs 608.18 Daltons.

38. Additionally, molecules with less than 8 hydrogen bonds have an increased likelihood of penetrating the BBB. These are weak intermolecular (i.e., between molecules) bonds between a lone pair electron "donor" and an electron "acceptor." If the "acceptor" is the team, the lone pair "donor" is the person who is getting picked last. Montelukast has 4 hydrogen bond acceptors and 2 hydrogen bond donors. Rendering the drug capable of having only 6 hydrogen bonds. Because of this, montelukast has an inherent increased likelihood of penetrating the BBB.

39. In order to deliver neurotherapeutic drugs to the brain to treat illnesses such as depression, schizophrenia, and obsessive-compulsive disorder, they must be able to cross the BBB. More lipid soluble or lipophilicity molecules are better able to penetrate the CNS.<sup>6</sup> Montelukast has been proven more lipid soluble than its sister class drug, Zafirlukast. In other words, because montelukast "likes" dissolving in fats or oils more than zafirlukast, montelukast is better able to cross the BBB.<sup>7</sup>

40. Because montelukast crosses the BBB, it exerts a systemic effect upon the CNS that results in, among other things, adverse neuropsychiatric events.

**b. Singulair Crosses the Blood-Brain-Barrier**

41. Montelukast crosses the BBB and thereby accumulates in the central nervous system (CNS), which is constituted by the brain and spinal cord. This drug accumulation occurs with both oral and intravenous doses, and in both humans and animals:

Most importantly, in a human subject taking 10 mg per day montelukast, that is, the approved dose to treat asthma, we detected [oral] montelukast in the serum and in the CSF in a similar concentration as in the rats (Supplementary Fig. 1a), suggesting that the standard 10 mg per day dose in humans is sufficient to reach a therapeutic dose in the CSF. In addition, a re-analysis of the original CNS pharmacology data of montelukast<sup>27</sup> indicates a significant BBB penetrance of the drug (Supplementary Fig. 1b). **These data clearly demonstrate that orally administered montelukast does cross the BBB in a therapeutic dose**, and that age-dependent differential BBB integrity does not affect the capacity of montelukast to enter the brain...

Remarkably, montelukast serum levels [following intravenous drug administrations in rats] were almost identical to the maximum plasma concentrations in humans after oral administration of the clinical dose of 10 mg montelukast daily... illustrating that the animals were treated with montelukast in a dose that pharmacologically resembles the one that is approved for its use in humans.<sup>8</sup>

42. Studies show that expression of the CysLTR1 (including that bound with montelukast) is not limited to the lungs. Instead, it occurs in different cells in the brain, including microvascular endothelial cells—components of the blood brain barrier. Pre-clinical studies of human and animal model tissue implicate CysLTR1 antagonists (e.g., Singulair®/montelukast, Onon/pranlukast, and Accolate/zafirlukast) as exerting effects upon traumatic brain injuries (TBI), ischemic brain injuries (e.g., stroke, TIA), cold-induced brain injuries, multiple sclerosis, autoimmune encephalomyelitis, Alzheimer's disease, and Parkinson's disease.<sup>9</sup> Activation of CysLTR1 is associated in animals with facilitating pathogen entry into the brain by disrupting the Blood Brain Barrier (BBB).<sup>10</sup> Among these pathogens are HIV-1 and *Escherichia coli*-mediated

<sup>10</sup> Bertin J, Jalaguier P, Barat C, et al. Exposure of human astrocytes to leukotriene C4 promotes a CX3CL1/fractalkine-mediated transmigration of HIV-1-infected CD4 + T cells across an in vitro blood-brain barrier model. *Virology*

meningitis.<sup>11</sup> Furthermore, “[i]t has been demonstrated that [Singulair®] could increase the proliferation of neuronal precursor cells in vitro through the receptors CysLT1R and GPR17 [(G protein-coupled receptor 17)].”<sup>12</sup> Accordingly, although “expression of the CysLT1R in the normal human brain is very low/non-existent,” montelukast blockades GPR17 and thereby “strongly elevate[s] neural stem and progenitor proliferation.”<sup>13</sup> In other words, montelukast affects nerve cell growth by expressing the activity of receptors.

43. Singulair® accumulates in the brain at a rate that is higher than its accumulation in the lungs:

Although montelukast was so far always considered as a drug with only limited CNS penetration, careful re-analysis of the original pharmacokinetic report on montelukast reveals that one hour after i.v. drug administration, a substantial amount of radioactive equivalents of [C14] montelukast (~1/10 of the plasma levels) had reached the brain (Supplementary Fig. 1b). Most remarkably, while in plasma (and most other organs, for example, lung and muscle) montelukast levels strongly decreased within 24 h, the amount of montelukast in the brain increased. As a consequence, **24 h after drug injection, montelukast levels in the brain were even higher than in plasma** (Supplementary Fig. 1b), suggesting the existence of an active transport mechanism for montelukast through the BBB.

44. Singulair® accumulates in the brain because of its binding affinity to a BBB transporter:

Indeed, montelukast is taken up from the intestine into the blood stream by the organic anion-transporting polypeptide (OATP)2B1, a transporter that is expressed also by endothelial cells of brain capillaries. Also, **the majority (99%) of montelukast in plasma is bound to proteins, mainly albumin, providing a BBB transport mechanism as albumin has been shown to act as a carrier through the BBB. The potential of montelukast to enter the CNS is further strongly supported by your present pharmacokinetic results obtained from rats** (Supplementary Fig. 1a).

Harinstein, and Monica Munoz, “Neuropsychiatric Events with Use of Montelukast in Pediatric Patients,” *FDA Briefing Document: Pediatric Advisory Committee Meeting*, (Sept. 27, 2019), p. 14, § 1.4.4. Accessed at <https://www.fda.gov/media/131035/download>.

1  
2 45. Pre-clinical data also provide ample evidence of how montelukast enters into the  
3 brain:

4 Strikingly, montelukast was also detected in the CSF in a human asthma patient,  
5 who was on the approved 10 mg per day dose of montelukast, and levels in serum  
6 and CSF were almost identical to the concentrations found in rats treated with  
7 10 mg kg<sup>-1</sup> montelukast (Supplementary Fig. 1a). **Entry of montelukast into the**  
8 **CNS is further supported by the plethora of preclinical data on the effects of**  
9 **systemic montelukast treatment on brain structure and function.** In various  
10 animal models of neurodegenerative diseases, including a model of kainic acid-  
11 induced loss of memory function, an acute Huntington's disease model of  
12 quinolinic acid and malonic acid injection-induced degeneration of striatal  
13 neurons, and a  $\beta$ -amyloid injection model of Alzheimer's disease, treatment with  
14 montelukast attenuated behavioural deficits, which was accompanied by structural  
15 brain changes such as inhibition of neuroinflammation and reduced neuronal cell  
16 death.<sup>14</sup>

17 46. Animal studies demonstrate that Singulair® administered orally can be found in the  
18 brain and cerebrospinal fluid (CSF) found in the subarachnoid space between the two innermost  
19 (arachnoid mater and pia mater) of three protective membranes covering the brain and spinal  
20 cord:

21 The biologic mechanisms underlying the neuropsychiatric events associated with  
22 montelukast treatment are currently not well understood. However, evidence from  
23 animal studies suggests that montelukast could act directly on cells in the brain.  
24 Orally administered montelukast (10 mg/kg/day, 7 days) was **detectable in brain**  
25 **tissue and cerebrospinal fluid (CSF)** in rats, providing evidence for its ability to  
26 **cross the blood-brain barrier.**<sup>15</sup>

4 **c. Because Singulair® (Montelukast) Crosses the Blood-Brain-Barrier, It Can**  
 5 **and Does Cause Neuropsychiatric Events.**

6 47. The risk of new neuropsychiatric events is greater in pediatric patients who take  
 7 Singulair®. "Children with asthma who experienced suicidality (i.e., suicidal thoughts), depression,  
 8 tics, tremors, stuttering, agitation, and night terrors. A new-onset neuropsychiatric event [have]  
 9 nearly twice the odds of having been prescribed montelukast in the year before their event."<sup>20</sup>  
 10 Furthermore, "children prescribed montelukast for asthma management had nearly twice the odds  
 11 of neuropsychiatric events, compared with those on other asthma maintenance medications."<sup>21</sup>

12 48. Additionally, a 2016 retrospective analysis of Individual Case Safety Reports  
 13 (ICSRs) recorded up to January 1, 2015, in the World Health Organization's (WHO) database  
 14 (VigiBase®), pulling from over 20 million reports of global suspected adverse effects of medicines.  
 15 Their findings were as follows:

16 Neuropsychiatric disorders as side effects of montelukast were more frequently  
 17 reported for children than for adults. Infants and children seem to be more prone to  
 18 sleep disturbances, whereas adolescents present symptoms of depression/anxiety  
 19 and psychotic reactions more often. Suicidal behavior and completed suicide appear  
 20 to be more frequently reported than previously thought in practice...Practitioners  
 21 should be aware of the risk of neuropsychiatric events associated with montelukast  
 22 use, and should advise the patient and report new cases.<sup>17</sup>

23 Thus, the neuropsychiatric dangers posed by Singulair® are much greater for children than  
 24 for adults. Children with new onset neuropsychiatric events are twice as likely to have taken  
 25 Singulair®, and children who are taking Singulair® are twice as likely to have neuropsychiatric

26 <sup>16</sup> FDA Briefing Document, p. 14, § 1.4.4 (citing Volpe C, Kalra D, A. N. *Pharmacovigilance Review of Neuropsychiatric and Churg-Strauss Syndrome* (Feb. 21, 2014); Kalra D, Gatti J, T P. *Pediatric Postmarketing Pharmacovigilance and Drug Utilization Review of Montelukast* (September 2, 2014)).

 28 Disproportionality Analysis of the VigiBase®. *Drug Safe.* (Springer, 2016: New York, NY) 39:69-78, 69; see 76. Doi:  
 10.1007/s40264-015-0360-2. (n = 14,670 ICSRs, 2,630 neuropsychiatric events in people aged <18 years).

1 events when compared with those taking other drugs (e.g., inhaled corticosteroids). This is  
 2 significant because inhaled corticosteroids are known to have “**severe adverse psychological effects**  
 3 **including psychosis**”<sup>18</sup> which can also “manifest in cognitive disorders, behavioral changes, and  
 4 frank psychiatric disease.”<sup>19</sup>

5 49. The risk of neuropsychiatric events associated with taking Singulair® are greater than  
 6 those associated with taking ICS (e.g., albuterol). “In the real-life setting, children initiated on  
 7 montelukast experience a **notable risk of neuropsychiatric ADRs leading to drug cessation**, that  
 8 is significantly higher than that associated with [inhaled corticosteroids] ICS.”<sup>20</sup>

9 50. Suicidality (i.e., suicidal thoughts) and suicide are a very real risk of taking  
 10 Singulair®. “Suicidal behavior and completed suicide appear to be more frequently reported than  
 11 previously thought in practice...Practitioners should be aware of the risk of neuropsychiatric events  
 12 associate with montelukast use and should advise the patient and report new cases.” (n = 14,670  
 13 Individual Case Safety Reports for montelukast).<sup>21</sup> Additional studies have found,

14 “[M]ontelukast is associated with neuropsychiatric adverse drug reactions such as  
 15 depression and aggression [and nightmares in children].”<sup>22</sup> Additionally, “[adverse  
 16 drug reactions in published case reports] included agitation, anxiety, depression,  
 17 sleep disturbance, hallucinations, **suicidal thinking and suicidality, tremor,**  
 18 **drowsiness, neuropathies, and seizures.**” Further, immune system, induction of  
 hypersensitivity reactions, and hepatobiliary/pancreatic/uropoietic disorders “**are**  
 17 **characterized by severe prognosis (i.e., neurological deficit and fatal**  
 18 **hepatotoxicity.**”<sup>22</sup>

 28 added).

1           51. Singulair® causes a decrease in neuronal proliferation (nerve growth) in the  
 2 hippocampal neurogenic zone (part of the brain largely involved in things from short-term memory  
 3 to long-term memory, and spatial memory). Montelukast can cause **“negative effects both acutely  
 4 and after 2 weeks of daily administration of montelukast.”**<sup>23</sup> In short, giving Singulair® to  
 5 healthy children can delay their nerve growth in the part of the brain that is most important to short-  
 6 term memory, long-term memory, and spatial memory. Furthermore, alterations in the hippocampus  
 7 have been linked to a variety of cognitive pathologies such as anxiety, depression, addiction and  
 8 neurodegenerative diseases such as Parkinson’s.<sup>24</sup>

9  
 10           **C. Defendants Knew the Risks of Neuropsychiatric Events but Failed to Warn**  
 11           **Prescribers, Parents or Patients of the Risks, and Even Misrepresented the Safety**  
 12           **of Singulair.**

13           52. When Singulair was originally approved by the FDA, it had no warnings regarding  
 14 neuropsychiatric events.

15           53. Merck knew that Singulair crosses the blood-brain-barrier from pre-clinical trials,  
 16 conducted prior to original approval.

17           54. Specifically, Merck Defendants misled the FDA with purpose and intent in its  
 18 original New Drug Application (NDA) 20.829 and 20.830 which were used to obtain FDA approval  
 19 for Singulair®5mg intravenous dosing. The footnotes to Table 4 of said NDAs state “only trace  
 20 amounts were detected in the brain” and “radioactivity in all tissues declined with time, and the  
 21 remaining radioactive equivalents in tissues were very low at 24 hour post dose”. However, Table  
 22 4 in fact demonstrates the amount of radiolabeled drug in the brain increased over time and when  
 23 looked at as a ratio of brain:plasma, 0.041:0.142, **the 24 hour interval the level in the brain is 3.46**  
 24 **times or 346% greater than in the plasma.** Furthermore, from 1 hour post administration to the  
 25 24 hour interval the radioactive level of drug in the **plasma decreased by 96.64%**, whereas the

26  
 27 <sup>23</sup> *Id* at 6.

28 <sup>24</sup> See 5. Sapolsky R. M., “Glucocorticoids and hippocampal atrophy in neuropsychiatric disorders,” *Arch Gen Psychiatry*. 2000;57:925–935. Doi: 10.1001/archpsyc.57.10.925.

1 radioactive level of drug in the brain increased by 21.36% if you are just looking at volume  
2 in each specific tissue and not a ratio of brain: plasma. Despite this data being statistically  
3 significant, Merck Defendants neglected to study the effects on the brain in clinical trials and misled  
4 the FDA in the way they reported their data.<sup>25</sup>

5 55. Two years before it was permitted to sell Singulair® in the United States, Defendant  
6 Merck obtained a patent for montelukast. In the patent application, *Defendant Merck claimed that*  
7 *montelukast is “useful in treating ...cerebral spasm,”*<sup>26</sup> admitting that at least by 1996, Merck  
8 Defendants knew montelukast could affect the brain. Nonetheless, the Singulair® label from the  
9 day Merck Defendants began sales in 1998 contained no warning of Singulair®’s possible effect on  
10 the brain, let alone of neuropsychiatric events.

11 56. Two and a half years after approval, on August 2, 2001, the “Post-Marketing  
12 Experience” section of Singulair’s label was changed to state that “dream abnormalities and  
13 hallucinations, drowsiness, irritability, agitation including aggressive behavior, restlessness [and]  
14 insomnia” have been observed.

15 57. This label change should have occurred earlier through the Changes Being Effected  
16 (“CBE”) Process. Merck had Newly Acquired Information (“NAI”), which would have permitted  
17 Merck to make this label change under the CBE.

18 58. Specifically, Merck should have conducted new analysis of clinical and preclinical  
19 testing data. The NAI would have been derived from the new analysis.

20 59. On June 23, 2004, the term “insomnia” was changed to “trouble sleeping.” Merck  
21 made this change using the “Changes Being Effected” process.

22 60. Just five days after Merck changed “insomnia” to “trouble sleeping,” Merck  
23 overhauled Singulair’s label using CBE.

24 61. “Psychomotor hyperactivity” was added to the overdose section of the label on June  
25

26 <sup>25</sup> Merck, “Table 4: Radioactive Equivalents (ug/g or ug/ml) of <sup>14</sup>C[Montelukast in the Tissues of Rats Receiving 5  
27 mg/kg i.v. (Mean ± SD; n=3) [Sponsors Table 17 Ref. G-1 Vol. 29 pp. G-65]” [brackets original], *NDA 20.829 and*  
*20.830*, 13.

28 <sup>26</sup> U.S. Patent No. 5,565,473

1 27, 2005.

2 62. The 2005 revision should have been made earlier through the CBE process through  
3 reanalysis of existing preclinical and clinical data.

4 63. Through the CBE process, Merck added the term “suicide” and replaced  
5 “psychomotor hyperactivity” with the “anxiousness” in the “Post-Marketing Experience”  
6 subsection of the Package Insert and the “Less Common Side Effects” section of the patient package  
7 insert.

8 64. The NAI information that enabled Merck to add the term “suicide” on information  
9 and belief, would have also enabled Merck to add the term “suicidality,” which should have been  
10 added and explained.

11 65. This should have triggered Merck to engage in reanalysis of the data already  
12 submitted to the FDA or conduct additional tests to determine the extent of the dangers of  
13 neuropsychiatric injuries. Upon information and belief, Merck did not conduct a reanalysis or  
14 additional testing.

15 66. When Merck added the terms “suicide” and “anxiousness” through the CBE, Merck  
16 should have made the warnings regarding those injuries stronger.

17 67. On August 19, 2009, FDA approved revisions to the PRECAUTIONS and  
18 ADVERSE REACTIONS sections of the label.

19 68. These revisions should have been made earlier and when made should have been  
20 more pronounced based on information Merck knew or should have known from reanalysis of  
21 preclinical and clinical trials.

22 69. These revisions should have been more strongly worded based on the increasing  
23 body of publicly available scientific literature regarding montelukast.

24 70. These revisions should have been more strongly worded based on post-marketing  
25 surveillance information available to the Merck Defendants.

26 71. Merck used the CBE to add the term “disorientation” to the “Warnings, Precautions  
27 and Adverse Events” section of the label on April 14, 2010.

28 72. Again, using CBE Merck added the term “tic” to the “Post-Marketing Experience”

1 and “Neuropsychiatric Events” sections of the Prescribing Information. On the same date, using  
2 the CBE, Merck added “uncontrolled muscle movements” to the Patient Information Leaflet.

3 73. These revisions should have been more strongly worded, more pronounced, and  
4 should have been made sooner based on all the “newly acquired information” available to Merck,  
5 including but not limited to reanalysis of clinical and preclinical studies, publicly available  
6 articles, and post-marketing information.

7 74. In June 2018, through CBE, Merck added the term “obsessive-compulsive  
8 symptoms” to several sections of the label.

9 75. On information and belief, using the CBE process, Merck should have strengthened  
10 all of the neuropsychiatric warnings, including those involving obsessive-compulsive symptoms  
11 prior to that time.

12 76. “Dysphemia (stutteting)” was added to the Singulair label on February 13, 2019,  
13 through CBE.

14 77. In November 2017, several patient advisory groups petitioned the FDA to strengthen  
15 Singulair’s warnings with regard to neuropsychiatric events..

16 78. On September 27, 2019, the Pediatric Advisory Committee and the Drug Safety and  
17 Risk Management Advisory Committee of the FDA held a hearing to discuss the patient advisory  
18 groups’ requests.

19 79. Following that hearing, the FDA required the Merck defendants to add a black box  
20 warning to the Singulair label.

21 80. Merck Defendants and/or Organon revised the label to include the black box  
22 warning.

23 81. These revisions should have been made much sooner based on adverse event and  
24 other post-marketing information as well as reanalysis of existing studies and scientific literature.

25 82. All of these revisions should have been made earlier and when made should have  
26 been more pronounced and should have included stronger language based on information Merck  
27 knew or should have known from reanalysis of preclinical and clinical trials.

28 83. All of these revisions should have been made earlier and when made should have

1 been more pronounced and should have included stronger language based on information Merck  
 2 knew or should have known from the increasing body of publicly available articles regarding  
 3 montelukast.

4 84. All of these revisions should have been made earlier and when made should have  
 5 been more pronounced and should have included stronger language based on information Merck  
 6 knew or should have known from post-marketing surveillance information available to the Merck  
 7 Defendants.

8 85. For example, by 2015, over a quarter of the adverse events reported to the FDA  
 9 included neuropsychiatric adverse events, including serious adverse events, such as homicidal and  
 10 suicidal ideation, psychosis, and hallucinations, totaling thousands of such reports and over 25% of  
 11 the total adverse events reported. Furthermore, the United States General Accounting Office has  
 12 testified before Congress that, "Experts believe that FDA's [Adverse Event Reporting System  
 13 (AERS) system [only] includes an estimated 1 to 10 percent of adverse reactions."

14 86. Indeed, every year since Singulair®'s launch in 1998, neuropsychiatric adverse event  
 15 reports involving children two months to 17 years of age have been filed with the FDA in connection  
 16 with Singulair®. In 1998 alone, 10 neuropsychiatric adverse events involving children were  
 17 reported. In 1999, an additional 83 adverse events were reported. Sixty-six more children using  
 18 Singulair® suffered neuropsychiatric adverse events in 2000. By 2020, a total of 3,135 children  
 19 suffered such events, as reported to the FDA, including 242 children under 24 months of age.  
 20 Furthermore, the United States General Accounting Office has testified before Congress that,  
 21 "Experts believe that FDA's [Adverse Event Reporting System (AERS) system [only] includes  
 22 an estimated 1 to 10 percent of adverse reactions."<sup>27</sup>

23 87. Plaintiffs would not have used Singulair if they knew the risks of neuropsychiatric  
 24 events.

25  
 26  
 27 <sup>27</sup> Janet Heinrich (Assoc. Dir. Health Fin. And Pub. Health Issues, Health and Human Serv. Div.), "Adverse Drug  
 28 Events: Substantial Problem but Magnitude Uncertain [GAO/T-HEHS-00-53]," *Testimony: Before the Committee on  
 Health, Education, Labor, and Pensions, U.S. Senate* (United States General Accounting Office: Tues Feb. 1, 2000), 6.  
 Accessed at <https://www.gao.gov/new.items/he00053t.pdf>.

**D. The NDA Holder (aka “Brand”) is Responsible for Label Revisions. The ANDA Holders (aka “Generics”) Must Make the Label on Generic Drugs Substantially the Same as the Brand.<sup>28</sup>**

88. In August 2012, Merck’s United States patent expired for Singulair. Immediately thereafter, the FDA approved a number of generic forms of Singulair for sale in the United States. Notwithstanding the availability of generic forms of Singulair Merck has continued to manufacture, distribute, and market Singulair in its brand-named form throughout the United States, including in California.

89. As the brand-name manufacturer of Singulair, Defendants had and have a duty to maintain the accuracy and adequacy of the label for Singulair for as long as the drug is on the market. As the brand-name manufacturer of Singulair, Defendants were not only in the best position to warn of Singulair’s harmful effects, but were also the only manufacturers with the unilateral authority under federal law to issue such a warning.

90. Generic manufacturers for the bioequivalent of Singulair have only the duty to ensure their labels for generic bioequivalent to Singulair are the same as the label used by the brand name manufacturer, here, Defendants. Indeed, such sameness is required. As such, Defendants exercised complete control over the contents of the generic drug label attached to any generic Singulair Plaintiffs may have used.

91. As a result, Defendants knew that any deficiencies in the label for Singulair would be perpetuated in the label of its generic bioequivalent. Accordingly, it is foreseeable that the warnings included or omitted on the brand-name drug label would influence dispensing of the generic drug.

92. As the brand name manufacturer of Singulair, Defendants had and have a duty to update its warning label “as soon as there is a reasonable evidence of an association of a serious hazard with a drug; a causal relationship need not have been proved.” 21 C.F.R. § 201.80(e).

<sup>28</sup> “Defendants” in this section refer to the Merck Defendants at least until 2020, and thereafter if the Merck Defendants continued to hold the NDA. If the NDA was transferred to Organon in 2020, these allegations apply to the Merck Defendants up to the time of transfer and to Organon thereafter.

93. As the brand name manufacturer of Singulair, Defendants could have, at any time, unilaterally updated the Singulair label without waiting for FDA preapproval in order to “add or strengthen a contraindication, warning, precaution, or adverse reaction” under the “changes being effected” regulation. 21 C.F.R. § 314.70(c)(6)(iii)(A). As the brand name manufacturer of Singulair, a part of Defendants’ business was to give information about Singulair to the public and medical community upon which the safety of patients like Plaintiffs, depend.

94. Insurance is available to a brand name manufacturer, like Defendants, to insure against liability arising from their failure to adequately warn of the risks associated with Singulair/Montelukast that Defendants knew or reasonably should have known.

## TOLLING STATUTES OF LIMITATIONS

### Discovery-Rule Tolling

95. Within the period of any applicable statute of limitations, Plaintiffs could not have discovered through the exercise of reasonable diligence that Singulair® caused a significantly increased risk of adverse neuropsychiatric events.

96. Plaintiffs did not discover, and did not know of, facts that would have caused a reasonable person to suspect that his injuries were caused by Defendants’ concealment and suppression of the fact that individuals who ingested Singulair® were at significantly increased risk of developing neuropsychiatric events.

97. Plaintiffs could not have reasonably discovered the true extent of Defendants’ deception or suppression about Singulair®’s safety until the FDA required the Boxed Warning about the serious mental health side effects for Singulair® and the advisement on the restriction of use of Singulair®.

98. For these reasons, all applicable statutes of limitations have been tolled by operation of the discovery rule.

#### A. Estoppel

99. Defendants were under a continuous duty to adequately disclose to and inform Plaintiffs of the risk of developing neuropsychiatric events with Singulair®.

100. Defendants knowingly, affirmatively, and actively concealed, suppressed, ignored,

1 or recklessly disregarded the true risks of developing neuropsychiatric events associated with  
2 Singulair® and never updated the drug's label to adequately disclose this risk.

3 101. Based on the foregoing, Defendants are estopped from relying on any statutes of  
4 limitations in defense of this action.

### 5 **B. Continuing Tort**

6 102. The continuing tort doctrine applies when there is a repeated or continuous injury  
7 and the tort is not completed until the last injury is inflicted or the wrongdoing ceases. In cases of  
8 continuing torts, the statutes of limitations do not begin to run until the date of the last tortious act.

9 103. Plaintiffs used Singulair® over extended periods. Each time Plaintiffs ingested  
10 Singulair®, it constituted a continuing tort.

11 104. The time period associated with Plaintiffs' statute of limitations did not begin to run  
12 until, at the earliest, Plaintiffs' last use of Singulair®.

## 13 **CAUSES OF ACTION**

### 14 **FIRST CAUSE OF ACTION**

#### 15 **STRICT LIABILITY - DESIGN DEFECT**

#### 16 **(Against Merck Defendants and DOES 1-10, Inclusive)**

17 105. Plaintiffs incorporate by reference each preceding and succeeding paragraphs as  
18 though set forth fully at length herein.

19 106. At all times relevant, Defendants tested, developed, designed, labeled, manufactured,  
20 marketed, sold, distributed, advertised, and promoted Singulair®.

21 107. Singulair® is defective because it causes neuropsychiatric events. The risk of  
22 neuropsychiatric events from Singulair® ingestion, including but not limited to (a) agitation,  
23 aggressive behavior, or hostility; (b) attention problems; (c) bad or vivid dreams; (d) depression; (e)  
24 disorientation or confusion; (f) feeling anxious; (g) hallucinations (seeing or hearing things that are  
25 not really there); (h) irritability; (i) memory problems; (j) obsessive-compulsive symptoms; (k)  
26 restlessness; (l) somnambulism (sleepwalking); (m) stuttering; (n) suicidal thoughts (suicidality)  
27 and actions; (o) tremor or shakiness; (p) trouble sleeping; and (q) uncontrolled muscle movements  
28 (tics) were actually known to and foreseeable to Merck Defendants at all times during the period

1 which they manufactured and sold Singulair®.

2 108. The risks of neuropsychiatric injuries posed by Singulair® were reasonably  
3 foreseeable to Defendants.

4 109. The Singulair® used by Plaintiffs was defectively designed in that (1) its risks  
5 outweighed its utility, and (2) safer, feasible alternative designs are and were at all times available.  
6 These safer alternative designs include (a) modifying montelukast itself to make it less likely to pass  
7 the BBB, (b) modifying Singulair® without modifying montelukast to make it less likely that  
8 montelukast would pass the BBB, (c) modifying Singulair®'s dosing regimen to enable prescribers  
9 to prescribe the lowest therapeutic dose, (d) modifying Singulair®'s instructions to enable  
10 prescribers to prescribe the lowest therapeutic dose, and instruct patients to take Singulair® when it  
11 is less likely to cross the BBB.

12 110. As further described above, the scientific community expressed concern about  
13 the propensity of montelukast to cause an increased risk of neuropsychiatric events when ingested.  
14 From the time of Singulair®'s launch until the present day, various scientific literature, as further  
15 discussed above, has expressed concerns about an increased risk of adverseneuropsychiatric events  
16 in patients who ingest Singulair® (montelukast). Plaintiffs were unaware of this scientific literature,  
17 but Defendants were aware of it.

18 111. The risk of Singulair® outweighs its benefits.

19 112. Specifically, the benefit of Singulair® is, at best, the treatment and/or prevention of  
20 asthma and hay fever symptoms. This benefit is significantly outweighed by the risks posed by  
21 Singulair®--the risk of permanent neuropsychiatric effects, and possibly even death.

22 113. Plaintiffs and Plaintiffs' prescribers had many alternatives, including other  
23 leukotriene receptor antagonists, inhaled corticosteroids, antihistamines, and a host of other  
24 pharmaceutical and non-pharmaceutical options to Singulair®. No reasonable consumer would  
25 select, from a slew of equally effective, or possibly more effective products, the one that causes  
26 neuropsychiatric effects.

27 114. Additionally or in the alternative, there are feasible alternative designs to Singulair®.

28 115. Singulair® is and at all times was defective, unreasonably dangerous, and unsafe for

1 its intended purpose because, when ingested, it causes an increased risk of adverse neuropsychiatric  
2 events.

3 116. The risks of Singulair® causing neuropsychiatric injuries exist in part because  
4 montelukast crosses the blood-brain-barrier.

5 117. Defendants could have modified Singulair® in such a manner that it would not pass  
6 the blood-brain-barrier unabated.

7 118. They could have done this by changing the chemical montelukast itself.

8 119. Defendants had options, like modifying montelukast to be less lipid-soluble or  
9 modification of the hydrogen bonds to make passing the BBB more difficult.

10 120. This alternative design is feasible. Any of the three occasions when Merck  
11 Defendants requested approval of a new NDA, they could have presented this alternative to FDA.

12 121. Defendants also had options to modify Singulair® without modifying montelukast.

13 122. For example, Defendants could have added a faster acting anti-inflammatory to make  
14 the BBB less permeable, or could have made an extended release tablet to decrease the amount of  
15 montelukast assaulting the BBB at any one time.

16 123. This alternative is feasible. Many drugs include two otherwise approved active  
17 ingredients, one of which is frequently anti-inflammatory. Further, the capsules of approved drugs  
18 are often designed for extended release.

19 124. Additionally, the dosing regimen of Singulair® was defectively designed.

20 125. Defendants could have created dosing options that would have allowed prescribers  
21 to prescribe the lowest therapeutic dose, but did not do so.

22 126. Singulair® is available in three “sizes”: 4mg, 5mg, and 10mg. In other words,  
23 Merck’s testing revealed that there is some significant difference in as small as one mg increments,  
24 yet it did not provide a one mg option. Even though Merck is aware of some significant difference  
25 in adding just one mg to a patient’s dose (as in increasing from 4mg to 5mg), Merck made it  
26 impossible for a prescriber to increase a patient’s dosage by just one mg in most circumstances. For  
27 example, if a prescriber wants to increase a dose from 5mg, the prescriber must double the dose to  
28 10mg.

1           127. Simply creating additional dosing options is a feasible alternative design, as  
2 evidenced by the fact that Merck already created three doses. There is no reason to believe a fourth  
3 dosing option would be infeasible.

4           128. Furthermore, the instructions to prescribers were designed deficiently.

5           129. For example, Merck instructed prescribers to consider only a person's age when  
6 determining dosage, disregarding entirely weight, stage of development, severity of symptoms, and  
7 any other consideration.

8           130. Instructing prescribers to consider severity of symptoms and weight is the norm. It  
9 is feasible for Singulair®'s dosing regimen to fit the norm.

10           131. By way of another example, Merck also instructs prescribers to have patients ingest  
11 Singulair® before bed, even though the BBB is more susceptible when a person is sleeping.

12           132. Modifying instructions is feasible.

13           133. Thus, at the time Singulair® left Defendants' control, there were practical,  
14 technically feasible, and safer alternative designs, that would have prevented the harm without  
15 substantially impairing the reasonably anticipated or intended function of Defendants' medications  
16 for asthma and allergic rhinitis.

17           134. Defendants' omission of any alternative designs renders Singulair® not reasonably  
18 safe.

19           135. Singulair®'s design defects existed at the time Singulair® left Defendants'  
20 possession and control.

21           136. Singulair® reached the intended consumers, handlers, and users throughout the  
22 United States, including Plaintiffs, without substantial change in its condition as designed,  
23 manufactured, sold, distributed, labeled, and marketed by Defendants.

24           137. Plaintiffs ingested Singulair® for an approved purpose and experienced  
25 neuropsychiatric injuries as a result.

26           138. Plaintiffs ingested Singulair® without adequate knowledge of Singulair®'s  
27 dangerous characteristics.

28           139. At all times relevant, Plaintiffs used Singulair® in an intended or reasonably

1 foreseeable manner without knowledge of Singulair®'s dangerous characteristics.

2 140. Plaintiffs could not have reasonably discovered the defects and risks associated with  
3 Singulair® or montelukast-containing products before or at the time of ingestion and use as a result  
4 of Defendants' suppression of, failure to obtain, or failure to provide scientific information linking  
5 montelukast to neuropsychiatric events.

6 141. The defects in Singulair® were substantial and contributing factors in causing  
7 Plaintiffs' injuries, harms, losses, and damages and, but for Defendants' misconduct and omissions,  
8 Plaintiffs would not have sustained injuries, harms, losses, and damages.

9 142. Had Plaintiffs known of the defects in Singulair®, Plaintiffs would not have taken  
10 Singulair®. Instead, Plaintiffs would have taken a safer alternative to Singulair® that would not  
11 have exposed Plaintiffs to neuropsychiatric events.

12 143. Plaintiffs' injuries, harms, losses, and damages were directly and proximately caused  
13 by Singulair® and Singulair®'s defect while Plaintiffs purchased and used Singulair® in a  
14 reasonably foreseeable manner for which recovery is sought.

15 144. The benefits of Singulair®'s design are outweighed by the design's inherent risk of  
16 danger in causing neuropsychiatric events.

17 145. Defendants knowingly designed Singulair® with the design defect that causes  
18 Singulair® to cause an increased risk of neuropsychiatric events when ingested to maximize profits.

19 146. Defendants are therefore strictly liable for the damages caused to Plaintiffs.

## 20 **SECOND CAUSE OF ACTION**

### 21 **STRICT LIABILITY - FAILURE TO WARN**

22 **(Against Merck Defendants, Organon and DOES 1-10, Inclusive)**

23 147. Plaintiffs incorporate by reference each preceding and succeeding paragraph as  
24 though set forth fully at length herein.

25 148. "Defendants" in this cause of action refers to Merck while it held the NDA and if it  
26 did so, to Organon during the period it held the NDA.

27 149. Defendants tested, developed, designed, labeled, manufactured, marketed, sold,  
28 distributed, advertised, and promoted Singulair® during the periods set forth above.

1           150. At all times relevant, Defendants had a duty to properly test, develop, design,  
2 manufacture, inspect, package, label, market, promote, sell, distribute, maintain, supply, provide  
3 proper warnings, and take such steps as necessary to ensure Singulair® did not cause users and  
4 consumers to suffer from unreasonable and dangerous risks.

5           151. At all times relevant, Defendants had a continuing duty to warn Plaintiffs and  
6 Plaintiffs' prescribers of the dangers associated with Singulair® use.

7           152. At all times relevant, Defendants could have provided adequate warnings or  
8 instructions regarding the full and complete risks of Singulair® and its active ingredient montelukast  
9 because Defendants knew or should have known of the unreasonable risks of harm associated with  
10 the use of Singulair® and montelukast. Such warnings could have been adequately disclosed in  
11 circumstances not limited to Singulair®'s labeling.

12           153. At all times relevant, Defendants failed to investigate, study, test, or promote the  
13 safety or to minimize the dangers to users and consumers of Singulair® and to those who would  
14 foreseeably prescribe, use, or be harmed by Singulair®, including Plaintiffs.

15           154. Despite the fact that Defendants knew or should have known that Singulair® posed  
16 a grave risk of harm, they failed to exercise reasonable care to warn of the dangerous risks  
17 associated with its use. The dangerous propensities of Singulair® and its active ingredient,  
18 montelukast, as described above were either known to Defendants or scientifically knowable to  
19 Defendants through appropriate research and testing by known methods at the time Defendants  
20 distributed, supplied, or sold Singulair® and not adequately known to prescribing healthcare  
21 providers and end users and consumers, such as Plaintiffs.

22           155. Defendants knew or should have known that Singulair® created significant risks of  
23 serious bodily harm to consumers, as alleged herein, and Defendants failed to adequately warn  
24 prescribing healthcare providers and consumers, i.e., the reasonably foreseeable users, of the risks  
25 of ingesting Singulair®. Upon information and belief, Defendants wrongfully concealed or  
26 suppressed information concerning the dangerous nature of Singulair® and its active ingredient,  
27 montelukast, and further made false and/or misleading statements concerning the safety of  
28 Singulair® and montelukast.

1           156. Singulair® is and at all times was defective and not reasonably fit, suitable, or safe  
2 for its intended purpose because Defendants designed Singulair® in a defective manner and failed  
3 to give adequate warnings or instructions at the time Singulair® left Defendants' control and after.

4           157. Defendants failed to provide adequate warnings of the dangers regarding the fact that  
5 Singulair® caused an increased risk of adverse neuropsychiatric events in individuals who ingested  
6 Singulair®.

7           158. Defendants failed to provide adequate warnings of the dangers regarding the fact that  
8 Singulair® ingestion increased the risk suffering from neuropsychiatric events, including but not  
9 limited to (a) agitation, aggressive behavior, or hostility; (b) attention problems; (c) bad or vivid  
10 dreams; (d) depression; (e) disorientation or confusion; (f) feeling anxious; (g) hallucinations  
11 (seeing or hearing things that are not really there); (h) irritability; (i) memory problems; (j)  
12 obsessive-compulsive symptoms; (k) restlessness; (l) somnambulism (sleepwalking); (m)  
13 stuttering; (n) suicidal thoughts (suicidality) and actions; (o) tremor or shakiness; (p) trouble  
14 sleeping; and (q) uncontrolled muscle movements (tics).

15           159. Singulair®'s failure-to-warn defects existed at the time Singulair® left Defendants'  
16 control.

17           160. Defendants distributed Singulair® without sufficient warnings to notify Plaintiffs'  
18 prescribers or Plaintiffs of the dangers inherent in ingesting Singulair®.

19           161. Defendants knew or should have known that most physicians who prescribed  
20 Singulair® did not know or fully appreciate the seriousness of the risks associated with Singulair®  
21 or montelukast.

22           162. Plaintiffs ingested Singulair® for an approved purpose and experienced  
23 neuropsychiatric events as a result of his Singulair® use.

24           163. Defendants knew or should have known that the minimal warnings disseminated  
25 with Singulair® were inadequate, failed to communicate adequate information on the dangers and  
26 safe use of Singulair®, and failed to communicate warnings and instructions that were appropriate  
27 and adequate to render the product safe for its ordinary, intended, and reasonably foreseeable uses.

28           164. Had Plaintiffs or Plaintiffs' physicians known of the defects in Singulair®, Plaintiffs

1 would have been prescribed and would have ingested a safer alternative to Singulair® that would  
2 not have exposed him to increased risks of suffering neuropsychiatric events.

3 165. Plaintiffs ingested Singulair® without knowledge of its dangerous characteristics.

4 166. Plaintiffs' injuries, harms, losses, and damages were directly and proximately caused  
5 by Singulair®, including the lack, insufficiency, or adequacy of warning of Singulair®'s  
6 unreasonable dangers as set forth above while Plaintiffs used Singulair® in a reasonably foreseeable  
7 manner for which recovery is sought.

8 167. Defendants had a duty to properly warn Plaintiffs and Plaintiffs' physicians of the  
9 risks of Singulair® during the time when Plaintiffs' prescriptions were being filled with Defendants'  
10 Singulair®. Defendants' breach of this duty proximately caused the injuries described herein.

11 168. Defendants' misrepresentations proximately caused Plaintiffs' injuries.

12 169. Defendants are therefore strictly liable for the damages caused to Plaintiffs.

13 170. Defendants' conduct, as described above, is also oppressive and malicious.  
14 Defendants regularly risked the health and lives of consumers and users of Singulair®, including  
15 Plaintiffs, with knowledge of Singulair®'s dangers. Defendants have made conscious decisions not  
16 to voluntarily sell Singulair without re-design, re-labeling, adequately warning, or adequately informing  
17 physicians and the public, including Plaintiffs of the increased risk of developing neuropsychiatric  
18 events when ingesting Singulair®. Defendants are guilty of oppression, in that their conscious  
19 disregard for Plaintiffs' rights subjected Plaintiffs to cruel and unjust hardship of suffering  
20 neuropsychiatric injury, as described above. Further, Defendants are guilty of malice because their  
21 despicable conduct was willful or done with conscious disregard of the rights and safety of  
22 consumers, including Plaintiffs. Defendants' misconduct therefore warrants an award of exemplary  
23 damages.

### 24 **THIRD CAUSE OF ACTION**

#### 25 **NEGLIGENCE**

26 **(Against Merck Defendants, Organon and DOES 1-10, Inclusive)**

27 171. Plaintiffs incorporate by reference each preceding and succeeding paragraph as  
28 though set forth fully at length herein.

1           172. “Defendants” in this cause of action refers to Merck while it held the NDA and if it  
2 did so, to Organon during the period it held the NDA.

3           173. At all times relevant, Defendants had a duty to exercise reasonable care in the  
4 design, research, manufacture, marketing, advertisement, supply, promotion, packaging, sale, and  
5 distribution of Singulair®, including the duty to take all reasonable steps necessary to manufacture,  
6 promote, advertise, and/or sell a medication that was not unreasonably dangerous to consumers and  
7 users of the medication.

8           174. At all times relevant, Defendants had a duty to exercise reasonable care in the  
9 marketing, advertisement, and sale of Singulair®. Defendants’ duty of care owed to consumers and  
10 the general public included providing accurate, true, and correct information concerning the risks of  
11 using Singulair® and appropriate, complete, adequate, and accurate warnings concerning the  
12 potential adverse effects of ingestion of Singulair® and its active ingredient, montelukast.

13           175. At all times relevant, Defendants knew or, in the exercise of reasonable care, should  
14 have known of the hazards and dangers of Singulair® and specifically its increased risk of  
15 neuropsychiatric events when ingested.

16           176. Accordingly, at all times relevant, Defendants knew or, in the exercise of reasonable  
17 care, should have known that use of Singulair® could cause or be associated with Plaintiffs’ injuries,  
18 and thus, created a dangerous and unreasonable risk of injury to the users of Singulair®, including  
19 Plaintiffs.

20           177. Defendants also knew or, in the exercise of reasonable care, should have known that  
21 users and consumers of Singulair® and their prescribing physicians and healthcare providers were  
22 unaware of or did not know or fully appreciate the seriousness and magnitude of the risks associated  
23 with use of Singulair® and montelukast.

24           178. Defendants breached their duty of reasonable care and failed to exercise ordinary  
25 care in the design, research, development, manufacture, testing, marketing, supply, promotion,  
26 advertisement, packaging, sale, and distribution of Singulair® in that Defendants manufactured  
27 but and produced a medication containing montelukast, knew or had reason to know of the defects  
28 inherent in Singulair® or had reason to know that a user’s or consumer’s ingestion of Singulair®

1 created a significant risk of harm and unreasonably dangerous side effects, and failed to prevent or  
2 adequately warn of these risks and injuries.

3 179. Defendants were negligent in their promotion of Singulair® by failing to adequately  
4 disclose material risk information as part of their promotion and marketing of Singulair®, including  
5 the internet, television, and print advertisements. Nothing prevented Defendants from being honest  
6 in their promotional activities, and in fact, Defendants had a duty to disclose the truth about the risks  
7 associated with Singulair® in their promotional efforts outside of the of the context of labeling.

8 180. Defendants had and have the ability and means to investigate, study, and test their  
9 products and to provide adequate warnings, and Defendants failed to do so. Upon information and  
10 belief, Defendants have wrongfully concealed information and have further made false and/or  
11 misleading statements concerning the safety of Singulair® and montelukast.

12 181. Defendants' negligence included:

- 13
- 14 a) Manufacturing, producing, promoting, formulating, creating, developing,  
15 designing, selling, advertising, and/or distributing Singulair® without  
16 thorough and adequate pre- and post-market testing;
- 17 b) Manufacturing, producing, promoting, formulating, creating, developing,  
18 designing, selling, advertising, and/or distributing Singulair® while  
19 negligently and/or intentionally concealing and failing to disclose the  
20 results of trials, tests, and studies of ingesting Singulair® and specifically  
21 its active ingredient, montelukast, and, consequently, the risk of serious  
22 harm associated with ingestion of Singulair®;
- 23 c) Failing to undertake sufficient studies and conduct necessary tests to  
24 determine whether Singulair® was safe for its intended use;
- 25 d) Failing to use reasonable and prudent care in the design, research,  
26 manufacture, and development of Singulair® so as to avoid the risk of  
27 serious harm associated with the ingestion of Singulair®;
- 28 e) Failing to design and manufacture Singulair® so as to ensure it was at

1 least as safe and effective as other medications on the market treating the  
2 same and/or similar conditions;

3 f) Failing to provide adequate instructions, guidelines, and safety  
4 precautions to those persons Defendants could reasonably foresee would  
5 prescribe and use Singulair®;

6 g) Failing to adequately disclose to Plaintiffs, Plaintiffs' physicians,  
7 users/consumers, and the general public that use and ingestion of  
8 Singulair® presented severe risks of developing neuropsychiatric events;

9 h) Failing to adequately warn Plaintiffs, Plaintiffs' physicians,  
10 users/consumers, and the general public that Singulair®'s risk of harm  
11 was unreasonable and that there were safer and effective alternative  
12 medications available to Plaintiffs, prescribing physicians, and other  
13 consumers and Systematically suppressing or ignoring contrary evidence  
14 about the risks, incidence, and prevalence of the side effects of Singulair®  
15 and montelukast- containing medications;

16 i) Representing that Singulair® was safe for its intended use when, in fact,  
17 Defendants knew or should have known that Singulair® was not safe or  
18 presented serious risks when used for its intended purpose;

19 j) Declining to make or propose any changes to Singulair®'s labeling or  
20 other promotional materials that would alert consumers, physicians, and  
21 the general public of the seriousness and magnitude of the risks of  
22 ingesting Singulair® and its active ingredient, montelukast;

23 k) Advertising, marketing, and recommending the use of Singulair® while  
24 concealing or failing to adequately disclose or warn of the dangers known  
25 by Defendants to be associated with or caused by the use of Singulair®  
26 and montelukast;

27 l) Continuing to disseminate information to consumers and physicians that  
28 indicates or implies that Singulair® is safe for use; and

1 m) Continuing the manufacture and sale of Singulair® with the knowledge  
2 that it was unreasonably unsafe and dangerous.

3 182. Defendants knew and/or should have known that it was foreseeable that individuals  
4 such as Plaintiffs would suffer injuries as a result of Defendants' failure to exercise ordinary and  
5 reasonable care in the manufacturing, marketing, labeling, distribution, and sale of Singulair®.

6 183. Plaintiffs and Plaintiffs' prescribers did not know the nature and extent of the injuries  
7 that could result from the intended use of Singulair® or its active ingredient, montelukast. Absent  
8 Defendants' negligence, Plaintiffs would not have developed neuropsychiatric events.

9 184. As a direct and proximate result of Defendants placing Singulair® into the stream of  
10 commerce, Plaintiffs suffered injuries, harms, losses, and damages.

11 185. Defendants are therefore liable for Plaintiffs' damages arising from Defendants'  
12 negligence.

13 186. Defendants' conduct, as described above, was not only negligent but it was also  
14 oppressive and malicious. Defendants regularly risked the health and lives of consumers and users  
15 of Singulair®, including Plaintiffs, with knowledge of Singulair®'s dangers. Defendants have made  
16 conscious decisions not to voluntarily re-design, re-label, adequately warn, or adequately inform  
17 physicians and the public, including Plaintiffs of the increased risk of developing neuropsychiatric  
18 events when ingesting Singulair®. Defendants are guilty of oppression, in that their conscious  
19 disregard for Plaintiffs' rights subjected Plaintiffs to cruel and unjust hardship of suffering  
20 neuropsychiatric injury, as described above. Further, Defendants are guilty of malice because their  
21 despicable conduct was willful or done with conscious disregard of the rights and safety of  
22 consumers, including Plaintiffs. Defendants' misconduct therefore warrants an award of exemplary  
23 damages.

24 **FOURTH CAUSE OF ACTION**

25 **NEGLIGENCE MISREPRESENTATION**

26 **(Against Merck Defendants, Organon and DOES 1-10, Inclusive)**

27 187. Plaintiffs incorporate by reference each preceding and succeeding paragraphs as  
28 though set forth fully at length herein.

1           188. “Defendants” in this cause of action refers to Merck while it held the NDA and if it  
2 did so, to Organon during the period it held the NDA.

3           189. At all relevant times, Defendants designed, manufactured, tested (or not), packaged,  
4 labeled, marketed, advertised, promoted, supplied, distributed, sold, and/or otherwise placed  
5 Singulair/montelukast into the stream of commerce, and therefore owed a duty of reasonable care  
6 to avoid causing harm to those that consumed Singulair/montelukast, such as Plaintiffs.

7           190. Defendants were negligent, reckless, and careless and owed a duty to Plaintiffs to  
8 make accurate and truthful representations regarding Singulair/montelukast, Defendants breached  
9 their duty, thereby causing Plaintiffs to suffer harm.

10           191. Defendants represented to Plaintiffs, their physicians, and their prescribers via the  
11 media, advertising, website, social media, packaging, and promotions, among other  
12 misrepresentations described herein that Singular/montelukast was both safe and effective;  
13 consumption of Singulair/montelukast would not result in neuropsychiatric side effects; and  
14 Singulair/montelukast was safe for their intended use when, in fact, Defendants knew or should have  
15 known the product was not safe for its intended purpose.

16           192. These representations were false. Because Singulair/montelukast crosses the blood-  
17 brain-barrier, it can and does cause negative neuropsychiatric events. The side effects were so  
18 significant that the FDA required a Black Box warning on Singulair.

19           193. Defendants knew or should have known these representations were false and  
20 negligently made them without regard for their truth. Defendants had a duty to accurately provide  
21 this information to Plaintiffs. In concealing this information from Plaintiffs, Defendants breached  
22 their duty. Defendants also gained financially from and as a result of their breach.

23           194. Defendants intended for Plaintiffs, their physicians, and their prescribers to rely on  
24 these representations.

25           195. Each of these misrepresentations were material at the time they were made. In  
26 particular, each of the misrepresentations concerned material facts that were essential to the analysis  
27 undertaken by Plaintiffs as to whether to purchase or consume Singulair/montelukast.

28           196. Plaintiffs, their physicians, and their prescriber reasonably relied on these

1 representations and were harmed as described herein. Plaintiffs' reliance on Defendants'  
 2 representation was a substantial factor in causing Plaintiffs' harms. Had Defendants told Plaintiffs  
 3 the truth about the safety and composition of Singulair/montelukast, Plaintiffs would not have  
 4 consumed or purchased them.

5 197. Defendants' acts and omissions as described herein were committed in reckless  
 6 disregard of Plaintiffs' rights, interests, and well-being to enrich Defendants.

7 198. Plaintiffs was injured as a direct and proximate result of Defendants' negligent  
 8 misrepresentations regarding Singulair/montelukast as described herein. These injuries were, or  
 9 should have been, reasonably foreseeable to Defendants.

10 199. Defendants are therefore liable for Plaintiffs' damages arising from Defendants'  
 11 misrepresentations.

## 12 **FIFTH CAUSE OF ACTION**

### 13 **BREACH OF EXPRESS WARRANTY**

14 **(Against Merck Defendants, Organon and DOES 1-10, Inclusive)**

15 200. Plaintiffs incorporate by reference each preceding and succeeding paragraph as  
 16 though set forth fully at length herein.

17 201. "Defendants" in this cause of action refers to Merck while it held the NDA and if it  
 18 did so, to Organon during the period it held the NDA.

19 202. At all relevant times, Defendants engaged in the business of testing, developing,  
 20 designing, manufacturing, marketing, selling, distributing, and promoting Singulair®, which is  
 21 defective and unreasonably dangerous to consumers, including Plaintiffs, thereby placing  
 22 Singulair® into the stream of commerce.

23 203. Defendants had a duty to exercise reasonable care in the research, development,  
 24 design, testing, packaging, manufacture, inspection, labeling, distributing, marketing, promotion,  
 25 sale, and release of Singulair®, including a duty to:

- 26 a. ensure that its products did not cause the user unreasonably dangerous side
- 27 effects;
- 28 b. adequately warn of dangerous and potentially fatal side effects; and,

1 c. adequately disclose adverse material facts, such as the true risks associated  
2 with the use of Singulair®, when making representations to consumers and the  
3 general public, including Plaintiffs.

4 204. The ability of Defendants to properly disclose those risks associated with Singulair®  
5 is not limited to representations made on the labeling.

6 205. At all relevant times, Defendants expressly represented and warranted to the  
7 purchasers of their products, by and through statements made by Defendants in labels, publications,  
8 package inserts, and other written materials intended for consumers and the general public, that  
9 Singulair® was safe to human health, effective, fit, and proper for its intended use. Defendants  
10 advertised, labeled, marketed, and promoted Singulair® representing the quality to consumers and  
11 the public in such a way as to induce their purchase or use, thereby making an express warranty that  
12 Singulair® would conform to the representations.

13 206. These express representations include incomplete or inadequate warnings and  
14 instructions that purport, but fail, to adequately include the complete array of risks associated with  
15 use of Singulair®. Defendants knew and/or should have known that the risks expressly included in  
16 Singulair® warnings and labels did not accurately or adequately set forth the risks of developing the  
17 serious injuries complained of herein. Nevertheless, Defendants expressly represented that  
18 Singulair® products were safe and effective, that they were safe and effective for use by individuals  
19 such as Plaintiffs, and/or that they were safe and effective as a medication.

20 207. The representations about Singulair®, as set forth herein, contained or constituted  
21 affirmations of fact or promises made by the seller to the buyer, which related to the goods and  
22 became part of the basis of the bargain, creating an express warranty that the goods would conform to  
23 the representations.

24 208. Defendants placed Singulair® into the stream of commerce for sale and  
25 recommended its use to consumers and the public without adequately warning of the true risks of  
26 developing the injuries associated with the use of Singulair®.

27 209. Defendants breached these warranties because, among other things, Singulair® was  
28 defective, dangerous, and unfit for use, did not contain labels representing the true and adequate

1 nature of the risks associated with its use, and were not merchantable or safe for its intended,  
2 ordinary, and foreseeable use and purpose. Specifically, Defendants breached the warranties in the  
3 following ways:

4 i. Defendants represented through their labeling, advertising, and  
5 marketing materials that Singulair® was safe, and intentionally or negligently withheld and  
6 concealed information about the risks of serious injury associated with use of Singulair® and by  
7 expressly limiting or ignoring the risks associated with use within its warnings and labels; and

8 ii. Defendants represented that Singulair® was safe for use and  
9 intentionally or negligently concealed information that demonstrated that use of Singulair®  
10 created an increased risk of developing and causing NSEs, and that Singulair®, therefore, was not  
11 safer than alternatives available on the market.

12 210. Plaintiffs detrimentally relied on the express warranties and representations of  
13 Defendants concerning the safety and/or risk profile of Singulair® in deciding to purchase and  
14 obtain the product. Plaintiffs reasonably relied upon Defendants to accurately and adequately  
15 disclose known defects, risks, dangers, and side effects of Singulair®. Plaintiffs would not have  
16 purchased or used Singulair® had Defendants properly disclosed the risks associated with the  
17 product, either through advertising, labeling, or any other form of disclosure.

18 211. Defendants had sole access to material facts concerning the nature of the risks  
19 associated with Singulair®, as expressly stated within Singulair® warnings and labels, and knew  
20 that consumers and users such as Plaintiffs could not have reasonably discovered that the risks  
21 expressly included in Singulair® warnings and labels were inadequate and inaccurate.

22 212. Plaintiffs had no knowledge of the falsity, incompleteness, or inadequacy of  
23 Defendants' statements and representations concerning Singulair®.

24 213. Plaintiffs used Singulair® as researched, developed, designed, tested, manufactured,  
25 inspected, labeled, distributed, packaged, marketed, promoted, sold, or otherwise released into the  
26 stream of commerce by Defendants.

27 214. Had the warnings, labels, advertisements, or promotional material for Singulair®  
28 accurately and adequately set forth the true risks associated with the use of Singulair®, Plaintiffs'

1 injuries, rather than expressly excluding such information and warranting that the product was safe  
2 for its intended use, Plaintiffs could have avoided the injuries, harms, losses, and damages  
3 complained of herein.

4 215. As a direct and proximate result of Defendants' breach of express warranty, Plaintiffs  
5 have sustained pecuniary loss and general damages in a sum exceeding the jurisdictional minimum  
6 of this Court.

7 216. As a proximate result of Defendants' breach of express warranty, as alleged herein,  
8 there was a measurable and significant interval of time during which Plaintiffs suffered great mental  
9 anguish and other personal injury harms, losses, and damages.

10 217. As a proximate result of Defendants' breach of express warranty, as alleged herein,  
11 Plaintiffs sustained a loss of income and/or loss of earning capacity and/or other damages.

12 218. Defendants are therefore liable for Plaintiffs' damages arising from Defendants'  
13 breach of warranty.

#### 14 SIXTH CAUSE OF ACTION

#### 15 BREACH OF IMPLIED WARRANTY

16 (Against Merck Defendants, Organon and DOES 1-10, Inclusive)

17 219. Plaintiffs incorporate by reference each preceding and succeeding paragraph as  
18 though set forth fully at length herein.

19 220. "Defendants" in this cause of action refers to Merck while it held the NDA and if it  
20 did so, to Organon during the period it held the NDA.

21 221. At all relevant times, Defendants engaged in the business of testing, developing,  
22 designing, manufacturing, marketing, selling, distributing, and promoting Singulair®, which was  
23 and is defective and unreasonably dangerous to consumers, including Plaintiffs, thereby placing  
24 Singulair® into the stream of commerce.

25 222. Before the time Plaintiffs purchased Singulair®, Defendants impliedly warranted to  
26 its consumers, including Plaintiffs, that Singulair® was of merchantable quality and safe and fit  
27 for the use for which it was intended; specifically, as a medication.

28 223. Defendants failed to adequately disclose that Singulair® has dangerous

1 propensities when used as intended and that use of Singulair® carries an increased risk of  
2 developing severe injuries, including Plaintiffs' injuries.

3 224. Plaintiffs were some of the intended beneficiaries of the implied warranties made  
4 by Defendants to purchasers of Singulair®.

5 225. Defendants expected Singulair® to reach, and Singulair® did in fact reach,  
6 consumers and users, including Plaintiffs, without substantial change in the condition in which it  
7 was manufactured and sold by Defendants.

8 226. At all relevant times, Defendants were aware that consumers and users of their  
9 products, including Plaintiffs, would use Singulair® as marketed by Defendants, which is to say  
10 that Plaintiffs were foreseeable users and purchasers of Singulair®.

11 227. Defendants intended that Singulair® be used in the manner in which Plaintiffs, in  
12 fact, used it and which Defendants impliedly warranted to be of merchantable quality, safe, and fit  
13 for this use, even though Singulair® was not adequately tested or researched.

14 228. In reliance upon Defendants' implied warranty, Plaintiffs purchased and used  
15 Singulair® as instructed and labeled and in the foreseeable manner intended, recommended,  
16 promoted, and marketed by Defendants.

17 229. Plaintiffs could not have reasonably or adequately discovered or known of the risks  
18 of serious injury associated with Singulair®.

19 230. Defendants breached their implied warranty to Plaintiffs in that Singulair® was not  
20 of merchantable quality, safe, or fit for its intended use, or adequately tested. Singulair® has  
21 dangerous propensities when used as intended and can cause serious injuries, including those  
22 injuries complained of herein.

23 231. The harm caused by Singulair® far outweighed its benefit, rendering the product  
24 more dangerous than an ordinary consumer or user would expect and more dangerous than  
25 alternative products.

26 232. As a direct and proximate result of Defendants' breach of implied warranty,  
27 Plaintiffs have sustained pecuniary loss and general damages in sums exceeding the jurisdictional  
28 minimum of this Court.

233. As a proximate result of the Defendants' breach of implied warranty, as alleged herein, there was a measurable and significant interval of time during which Plaintiffs suffered great mental anguish and other personal injury and damages.

234. As a proximate result of Defendants' breach of implied warranty, as alleged herein, Plaintiffs sustained a loss of income and/or loss of earning capacity and/or other damages.

235. Defendants are therefore liable for Plaintiffs' damages arising from Defendants' breach of warranty.

## RELIEF REQUESTED

WHEREFORE, PLAINTIFFS prays for judgment against Defendants, and each of them, as follows:

1. Past and future general damages, the exact amount of which has yet to be ascertained, in an amount which will conform to proof at time of trial;
2. Past and future economic and special damages according to proof at the time of trial;
3. Loss of earnings and impaired earning capacity according to proof at the time of trial;
4. Medical expenses, past and future, according to proof at the time of trial;
5. Punitive or exemplary damages according to proof at the time of trial;
6. Attorney's fees, as allowable by law;
7. For costs of suit incurred herein;
8. For pre-judgment interest as provided by law; and
9. For such other and further relief as the Court may deem just and proper.

Respectfully submitted,

## CIVIL CASE COVER SHEET

☒ **Unlimited** (Amount demanded exceeds \$25,000) ☐ **Limited** (Amount demanded is \$25,000 or less)

## Complex Case Designation

☐ Counter ☐ Joinder  
Filed with first appearance by defendant (Cal. Rules of Court, rule 3.402)

CASE NUMBER:

C22-00717

JUDGE:

DEPT.:

Items 1-6 below must be completed (see instructions on page 2).

1. Check one box below for the case type that best describes this case:

## Auto Tort

☐ Auto (22)☐ Uninsured motorist (46)

Other PI/PD/WD (Personal Injury/Property Damage/Wrongful Death) Tort

☐ Asbestos (04)☒ Product liability (24)☐ Medical malpractice (45)☐ Other PI/PD/WD (23)

Non-PI/PD/WD (Other) Tort

☐ Business tort/unfair business practice (07)☐ Civil rights (08)☐ Defamation (13)☐ Fraud (16)☐ Intellectual property (19)☐ Professional negligence (25)☐ Other non-PI/PD/WD tort (35)

Employment

☐ Wrongful termination (36)☐ Other employment (15)

## Contract

☐ Breach of contract/warranty (06)☐ Rule 3.740 collections (09)☐ Other collections (09)☐ Insurance coverage (18)☐ Other contract (37)

## Real Property

☐ Eminent domain/Inverse condemnation (14)☐ Wrongful eviction (33)☐ Other real property (26)

## Unlawful Detainer

☐ Commercial (31)☐ Residential (32)☐ Drugs (38)

## Judicial Review

☐ Asset forfeiture (05)☐ Petition re: arbitration award (11)☐ Writ of mandate (02)☐ Other judicial review (39)

## Provisionally Complex Civil Litigation (Cal. Rules of Court, rules 3.400-3.403)

☐ Antitrust/Trade regulation (03)☐ Construction defect (10)☐ Mass tort (40)☐ Securities litigation (28)☐ Environmental/Toxic tort (30)☐ Insurance coverage claims arising from the above listed provisionally complex case types (41)

## Enforcement of Judgment

☐ Enforcement of judgment (20)

## Miscellaneous Civil Complaint

☐ RICO (27)☐ Other complaint (not specified above) (42)

## Miscellaneous Civil Petition

☐ Partnership and corporate governance (21)☐ Other petition (not specified above) (43)2. This case ☒ is ☐ is not complex under rule 3.400 of the California Rules of Court. If the case is complex, mark the factors requiring exceptional judicial management:a. ☒ Large number of separately represented partiesd. ☒ Large number of witnessesb. ☒ Extensive motion practice raising difficult or novel issues that will be time-consuming to resolvee. ☒ Coordination with related actions pending in one or more courts in other counties, states, or countries, or in a federal courtc. ☒ Substantial amount of documentary evidencef. ☐ Substantial postjudgment judicial supervision3. Remedies sought (check all that apply): a. ☒ monetary b. ☐ nonmonetary; declaratory or injunctive relief c. ☒ punitive

4. Number of causes of action (specify):

5. This case ☐ is ☒ is not a class action suit.

6. If there are any known related cases, file and serve a notice of related case. (You may use form CM-015.)

Date: March 3, 2022

## NOTICE

- Plaintiff must file this cover sheet with the first paper filed in the action or proceeding (except small claims cases or cases filed under the Probate Code, Family Code, or Welfare and Institutions Code). (Cal. Rules of Court, rule 3.220.) Failure to file may result in sanctions.
- File this cover sheet in addition to any cover sheet required by local court rule.
- If this case is complex under rule 3.400 et seq. of the California Rules of Court, you must serve a copy of this cover sheet on all other parties to the action or proceeding.
- Unless this is a collections case under rule 3.740 or a complex case, this cover sheet will be used for statistical purposes only.

Page 1 of 2

**INSTRUCTIONS ON HOW TO COMPLETE THE COVER SHEET**

CM-010

**To Plaintiffs and Others Filing First Papers.** If you are filing a first paper (for example, a complaint) in a civil case, you must complete and file, along with your first paper, the Civil Case Cover Sheet contained on page 1. This information will be used to compile statistics about the types and numbers of cases filed. You must complete items 1 through 6 on the sheet. In item 1, you must check **one** box for the case type that best describes the case. If the case fits both a general and a more specific type of case listed in item 1, check the more specific one. If the case has multiple causes of action, check the box that best indicates the **primary** cause of action. To assist you in completing the sheet, examples of the cases that belong under each case type in item 1 are provided below. A cover sheet must be filed only with your initial paper. Failure to file a cover sheet with the first paper filed in a civil case may subject a party, its counsel, or both to sanctions under rules 2.30 and 3.220 of the California Rules of Court.

**To Parties in Rule 3.740 Collections Cases.** A "collections case" under rule 3.740 is defined as an action for recovery of money owed in a sum stated to be certain that is not more than \$25,000, exclusive of interest and attorney's fees, arising from a transaction in which property, services, or money was acquired on credit. A collections case does not include an action seeking the following: (1) tort damages, (2) punitive damages, (3) recovery of real property, (4) recovery of personal property, or (5) a prejudgment writ of attachment. The identification of a case as a rule 3.740 collections case on this form means that it will be exempt from the general time-for-service requirements and case management rules, unless a defendant files a responsive pleading. A rule 3.740 collections case will be subject to the requirements for service and obtaining a judgment in rule 3.740.

**To Parties in Complex Cases.** In complex cases only, parties must also use the Civil Case Cover Sheet to designate whether the case is complex. If a plaintiff believes the case is complex under rule 3.400 of the California Rules of Court, this must be indicated by completing the appropriate boxes in items 1 and 2. If a plaintiff designates a case as complex, the cover sheet must be served with the complaint on all parties to the action. A defendant may file and serve no later than the time of its first appearance a joinder in the plaintiff's designation, a counter-designation that the case is not complex, or, if the plaintiff has made no designation, a designation that the case is complex.

**CASE TYPES AND EXAMPLES****Auto Tort**

Auto (22)—Personal Injury/Property Damage/Wrongful Death  
Uninsured Motorist (46) (*if the case involves an uninsured motorist claim subject to arbitration, check this item instead of Auto*)

**Other PI/PD/WD (Personal Injury/Property Damage/Wrongful Death) Tort**

Asbestos (04)  
Asbestos Property Damage  
Asbestos Personal Injury/Wrongful Death  
Product Liability (*not asbestos or toxic/environmental*) (24)  
Medical Malpractice (45)  
Medical Malpractice—Physicians & Surgeons  
Other Professional Health Care Malpractice  
Other PI/PD/WD (23)  
Premises Liability (e.g., slip and fall)  
Intentional Bodily Injury/PD/WD (e.g., assault, vandalism)  
Intentional Infliction of Emotional Distress  
Negligent Infliction of Emotional Distress  
Other PI/PD/WD

**Non-PI/PD/WD (Other) Tort**

Business Tort/Unfair Business Practice (07)  
Civil Rights (e.g., discrimination, false arrest) (*not civil harassment*) (08)  
Defamation (e.g., slander, libel) (13)  
Fraud (16)  
Intellectual Property (19)  
Professional Negligence (25)  
Legal Malpractice  
Other Professional Malpractice (*not medical or legal*)

Breach of Contract/Warranty (06)  
Breach of Rental/Lease  
Contract (*not unlawful detainer or wrongful eviction*)  
Contract/Warranty Breach—Seller Plaintiff (*not fraud or negligence*)  
Negligent Breach of Contract/Warranty  
Other Breach of Contract/Warranty  
Collections (e.g., money owed, open book accounts) (09)  
Collection Case—Seller Plaintiff  
Other Promissory Note/Collections Case  
Insurance Coverage (*not provisionally complex*) (18)  
Auto Subrogation  
Other Coverage  
Other Contract (37)  
Contractual Fraud  
Other Contract Dispute

**Real Property**

Eminent Domain/Inverse Condemnation (14)  
Wrongful Eviction (33)  
Other Real Property (e.g., quiet title) (26)  
Writ of Possession of Real Property  
Mortgage Foreclosure  
Quiet Title  
Other Real Property (*not eminent domain, landlord/tenant, or foreclosure*)

**Unlawful Detainer**

Commercial (31)  
Residential (32)  
Drugs (38) (*if the case involves illegal drugs, check this item; otherwise, report as Commercial or Residential*)

**Judicial Review**

Asset Forfeiture (05)  
Petition Re: Arbitration Award (11)  
Writ of Mandate (02)  
Writ—Administrative Mandamus  
Writ—Mandamus on Limited Court Case Matter  
Writ—Other Limited Court Case Review  
Other Judicial Review (39)  
Review of Health Officer Order  
Notice of Appeal—Labor Commissioner Appeals

**Provisionally Complex Civil Litigation (Cal. Rules of Court Rules 3.400–3.403)**

Antitrust/Trade Regulation (03)  
Construction Defect (10)  
Claims Involving Mass Tort (40)  
Securities Litigation (28)  
Environmental/Toxic Tort (30)  
Insurance Coverage Claims (*arising from provisionally complex case type listed above*) (41)

**Enforcement of Judgment**

Enforcement of Judgment (20)  
Abstract of Judgment (Out of County)  
Confession of Judgment (*non-domestic relations*)  
Sister State Judgment  
Administrative Agency Award (*not unpaid taxes*)  
Petition/Certification of Entry of Judgment on Unpaid Taxes  
Other Enforcement of Judgment Case

**Miscellaneous Civil Complaint**

RICO (27)  
Other Complaint (*not specified above*) (42)  
Declaratory Relief Only  
Injunctive Relief Only (*non-harassment*)  
Mechanics Lien  
Other Commercial Complaint Case (*non-tort/non-complex*)  
Other Civil Complaint (*non-tort/non-complex*)

**Miscellaneous Civil Petition**

Partnership and Corporate Governance (21)  
Other Petition (*not specified above*) (43)  
Civil Harassment  
Workplace Violence  
Elder/Dependent Adult Abuse  
Election Contest  
Petition for Name Change
